REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 14. THE REDCLIFF REVIEW, THURSDAY, OCT. 29, 1925. Number 43.

ALBERTA PROVINCIAL LIBRARY NOV 2 - 1925 EDMONTON

Mrs. Bert Sheldon Passed Away Suddenly

Died in Medicine Hat Hospital After An Operation

It is seldom the people of this town receive such a shock as they did Wednesday afternoon on receiving the sad news of the sudden death of Mrs. Bert Sheldon. The shock was all the greater as few people in town knew Mrs. Sheldon was seriously ill. Deceased went to Medicine Hat hospital a week ago to undergo an operation. This was performed and the patient appeared to be making satisfactory progress but Wednesday morning it was found that another operation was necessary. From this second operation the patient never recovered.

Deceased was a young woman in the summer time of life, only about 25 years old. She was always of a pleasant jolly disposition and always appeared in the best of health and spirits. For this reason her many friends here fairly grasped with surprise on learning of her sudden death.

Besides her husband, she leaves a little daughter, Phyllis, who is about six years old.

Deceased, whose maiden name was Evelyn Powell, was a daughter of Mr. and Mrs. F. Powell of Calgary.

The remains were taken to Calgary on Thursday morning's train and the funeral will be held in that city. The day for the funeral has not been set at the time of writing.

Mr. Sheldon and his little motherless daughter have the heart felt sympathy of the entire community.

Bye-Elections for Alberta to be Held

In Six Constituencies as Result of Resignations

It has been announced from Edmonton that bye-elections to fill the six vacancies in the Alberta Legislature created by the resignations of members who have entered the federal field, will be held before another session, but as yet no date has been fixed for these elections. The vacancies in the house were created by the resignations of the following members: C. W. Cross, Edson; S. G. Tobin, Leduc; T. C. Milnes, Claresholm; A. R. McLennan, Edmonton, Libera's; and Dr. Stewart, Lethbride, Conservative, and W. M. Davidson, Calgary, Independent.

Home for Children Asks for Support

Is Doing Good Work for Needy Children of Province

Amongst the charitable institutions of Alberta none is more deserving of the confidence and support of the Public than Woods Christian Home at Olds. For ten years this Institution has been giving hospitality and training to hundreds of Alberta's motherless and needy children and the ever-increasing number of applications for admission ras made it impossible for the Home to measure up to the needs of the Province.

This condition of things has led the Board of Managers to decide to make an appeal for funds, sufficient to build six additional cottags. If this appel meets with the generous response it deserves the building will be started as soon as possible and each cottage will be built to accommodate 25 children, which with the present buildings will enable the home to take care of 200 children. In foster father and mother, chosen because of their adaptability for the work, will be put in charge of each cottage and the policy of the Home "To keep the children together" will be strictly adhered to.

Although started as a private institution by Mr. Wood the property has since been turned over to a Board of Trustees and incorporated under the laws of the Province of Alberta.

Mrs. Fred Jones entertained a number of friends at her home last Saturday. The event was to celebrate Mrs. Jones' birthday. Progressive whist was planyed and Mrs. C. Newnham and B. Tonks won the first prizes. The consolations went to Mr. and Mrs. K. Johnson. A fine birthday cake made at H. Champ's bakery was served during the lunch. A most enjoyable evening was spent.

NOTICE TO BANDSMEN

All men in town who play musical band instruments are requested to meet at the local Armory on Sunday at 2:30 p.m. The idea is to see if a band can be arranged to take part in the Armistice Day Ceremony.

SCHOOL NEWS

School will be closed next Thursday and Friday on account of the staff going to attend the Seventeenth Annual Convention of the South-Eastern Alberta Educational Association to be held in the High School auditorium in Medicine Hat. As the following Monday is Thanksgiving Day, school will not re-open until Tuesday, November 10.

The new students are entertaining the old-timers at a Hallowe'en party to-morrow evening.

Sask. Pool Plans To Buy Elevators

Negotiations are about to be started by the Saskatchewan wheat pool for the purchase of the Saskatchewan Co-Operative Elevator Company's elevator system and equipment at a price to be fixed by arbitration, and also for leasing of the terminal elevator system operated by the Saskatchewan Co-Operative Elevator Company, according to an official statement issued by the pool directors last Wednesday.

A resolution authorizing the pool directors to open these negotiations was passed at the annual meeting of the pool delegates last week.

Should the negotiations not prove successful, the directors are authorized to acquire by purchase or construction country elevators and the necessary terminal space for the handling of pool grain within the limit of the estimated deductions under the existing pool contracts.

Churches

GORDON MEMORIAL UNITED CHURCH

R. N. Matheson, B.A., Minister

Dear stranger: If your home church is not in town Gordon Memorial folks will be glad to welcome you to share in their activities and service.

Organizations of Congregation meet—

Official Board, Second Tuesday of each quarter.

Communion Service, Second Sunday in each quarter, at 11:00 a.m.

Ladies' Aid, Thursday afternoon at 3 o'clock, except last Thursday of the month.

Women's Missionary Society, the last Thursday afternoon of each month at 3 o'clock.

C. G. I. T., Tuesday 8:00 p.m.

Willing Workers' Mission Band, the First and Third Mondays of each month at 4:15 p.m.

Sunday, November 1st.—

10:00 A.M., Church School.

11:00 A.M., Morning Worship.

Subject: "The Mystery Unfolded"

7:30 P.M., Evening Service.

Subject: "The Peril of Drifting."

ST. AMBROSE CHURCH

Rev. J. L. Cooper, B.A., Vicar

All Saints' Day, Nov. 1, (21st Sunday after Trinity.

Mattins at 10, a.m.

Holy Communion & Sermon, 11.

Children's Service, 3 p.m.

Evensong and Sermon, 7:30.

Monday, Nov. 2—Special W. A. meeting in Parish hall 3 p.m.

Wednesday, Nov. 4—J. W. A. 1st Div. meets 4:15 p.m.

Confirmation Class at Vicarage at 8 Thursday, Nov. 5—Hallowe'en Supper in Parish hall.

Friday, Nov. 6—J. W. A., 2nd Div., meets at 4:15 p.m.

Evensong at 7:30 followed by Choir practice.

CHURCH OF THE BRETHREN.

Sunday School, 10:30 a.m.

Usual services will be held.

ST. MARY'S CHURCH

Celebration of Mass 2nd and 4th Sundays of each month at 8.30 a.m. by Rev. Father Fitzpatrick.

Conservatives Will Have Largest Group In House

Now Have 121 Sure Seats -- Premier King and Eight Cabinet Ministers go Down to Defeat -- Progressive Block Badly Shattered - Gershaw Will Win Out in Medicine Hat

FLASH—The latest returns as we go to press are as follows:

Conservatives	121
Liberals	93
Progressives	18
Labor	3
Independents	1
Doubtful	10
TOTAL	245

Election returns so far would indicate that the Conservative party, led by Rt. Hon. Arthur Meighen, will have a small majority over all in the house when the returns are completed.

The Conservative party has made gains in every province in the Dominion and is now conceded to have 121 members elected, with 10 constituencies still in doubt. Should they win half of the seats now in doubt they will have a clear majority over all other parties.

Gershaw Leading

In Medicine Hat constituency, Dr. Gershaw has a good lead over his two opponents and will no doubt be elected. He is now 1700 ahead of Blackstock and over 2000 ahead of McDaniels.

Dr. Gershaw polled a heavy vote in Medicine Hat city receiving a majority of 984 over Blackstock. From the Conservative standpoint this was one of the biggest surprises of the election as it was thought Gershaw and Blackstock would break about even in the city.

Redcliff gave Blackstock a majority of 56. The vote stood Blackstock 199, Gershaw 143, McDaniels 13. This town polled a splendid vote as almost every available vote was cast.

The vote here here showed a big turnover of sentiment since the last Dominion election when the Conservative candidate only polled 46 votes. The vote in Redcliff in 1921 was Gershaw, Lib., 138; Gardiner, Pro., 105, and McIntosh, Con., 46.

In Calgary, Bennett and Davis, Conservatives, were elected with good majorities. Hon. Chas Stewart, Liberal, and Mr. Bury, Conservative, were elected in Edmonton. In Lethbridge the contest is close between Dr. Stewart and Jellif, with the odds slightly in the latter's favor.

A feature of the election was that McKenzie King was defeated in his own constituency in North York, and with him eight cabinet ministers went down to defeat. These are King himself, and Messrs. Foster, Marler, Murdock, Gordon, Graham, Massey and Low.

Arthur Meighen is conceded elected in Portage la Prairie by over 800 majority. If called upon to form a government he will be the first premier of Canada representing a western constituency.

The following was the last summary of the standing in the provinces

	Con.	Lib.	Pro.	Ind. or Labor
P. E. I.	2	2	2	2
N. B.	10	1		
Nova Scotia	11	3		
Quebec	4	50		1
Ontario	71	9	2	
Manitoba	8	2	5	2
Sask.	0	11	9	doubtful
Alberta	4	3	9	
B. C.	10	3	1	
TOTAL	120	93	26	3

WEMBLEY HEAVY LOSS TO BE PAID BY THE GUARANTORS

While the guarantors of the British Empire exhibition at Wembley are expected to have to find 75 percent of their guarantee, that is 15 shillings for every £1 guaranteed, no liability will attach to Canada in the matter of any deficit in connection with the big show. Canada simply provided her own part of the exhibition and paid for it practically out of hand at least, she has involved herself in no further liability than that connected with the Canadian pavilion at Wembley.

NEW TYPE OF CAR PUT IN OPERATION THE C. N. R.

The first oil-burning electric articulated car to be put into operation by the Canadian National Railways in Western Ontario left the terminals Tuesday afternoon for Southampton where it will go into regular service between that point and Palmerston and Guelph. A few weeks ago a small type of the oil-burning electric car was put into operation between Hamilton and Guelph where it has been giving excellent service ever since.

The Red Cross Child in the Home

Perhaps there is no greater proof of the value of the influence of Red Cross in the home, than the remarks of a mother whose child had recently joined the school branch. Her mother said, "It has entirely changed my little girl. She was a constant anxiety to me in the smaller matters of her personal hygiene. The care of hair, nails, teeth, etc., had been the subject of much nagging before I could get her to attend to them. Nowadays, she takes the greatest pride in herself, telling me that 'a Red Cross child must always be spick and span and shiny.' At her school they must have musical drill and songs with actions which refer to the morning health habits. This instils these duties firmly into the children's minds, and in the case of my little girl, they truly worked wonders. Then Johnnie, the young master of the house, who is only five and not yet at school, has made the acquaintance of the health fairies over the air, and is carrying out in his own small way, all the directions these fairy folk give, under the guise of fairy tales. I assure you it is a great help to have a child ready to go to bed of his own accord at an early hour, because the Health Fairy has told him to do so. In our house we are glad to have the influence of the Red Cross in the home; it has meant for our children, better health habits in their daily lives."

One of the chief reasons of a peace time Red Cross is the promotion of health publicly and privately by the means of popularly written health literature, a reliable free for distribution by the Alberta Division, by lectures on the Radio, by attractively featured health lessons in school branches. This program results in a better and higher standard of health in the home, and a finer quality of life and citizenship.

You are earnestly asked to support Red Cross by contributing to the Annual Appeal during the coming month.

For full information, please write to Alberta Division, Red Cross, Calgary.

ETHEL EILEEN HORNE.

Daughter of Mr. and Mrs. Gordon Horne, of Redcliff, who was awarded a Certificate of Merit, in the Empire Better Baby Contest at Wembley, having received Honorable Mention. Eileen at 7½ months, weighed 16 lbs. and her height was 27½ inches. She weighed 5 lbs., 8 ozs., at birth. The baby's mother was included in the award, having answered 6 questions on child training, satisfactorily. The Contest which is an annual feature of the British Empire Exhibition was open to contestants from all lands over which flies the Union Jack.

Eileen is enrolled in the Redcliff Child Welfare Clinic, which is a subsidary of the Medicine Hat Clinic, and it is very pleasing to know that two babies under the supervision of the Clinics supported by the Alberta government should bring good reports to Alberta, Eileen Horne of Redcliff, and John Duncan MacDonald of Calgary.

We extend to Mr. and Mrs. Horne our hearty congratulations.

GORDON MEMORIAL UNITED CHURCH

"A Dream of Fairyland"

"A Dream of Fairyland" is the subject of a delightful musical drama, which will be given by the Mission Band of Gordon Memorial United Church on Monday evening, Nov. 2nd. For weeks the groups have been busy practicing in order that they may present a real treat. They are quite confident they will receive the sympathetic support of the community. The program will begin at 8 o'clock sharp. Admission, adults 25c, children 15c.

Ontario to Have Big Paper Plants

Will Provide a Livelihood for Forty Thousand People

Hon. James Lyons, Ontario minister of lands and forests, at a public meeting last night announced that his department had allotted pulp limits to the Great Lakes Power Company, of Fort William, the Thunder Bay Paper Company, and the Provincial Paper Mill of Fort Arthur, and the Nipigon Company, sufficient to increase the quantity of newsprint manufactured at the head of the lakes from 215 to 1,525 tons per day, with an increased pay-roll of 9,680 men, who would sustain a population of over forty thousand people.

The limits were being allotted, the minister said, under guarantees that manufacture into the finished product would be undertaken within thirty days of the signing of the agreements and he said the development that provided for would make Port Arthur and Fort William the greatest newsprint producing centre in the world.

BRITISH FARM BOYS COMING TO CANADA

Three contingents of British farm boys are en route across the Atlantic for the Alberta agricultural schools. Advices to the department of agriculture state that a party of 20 left on October 9, on the steamship Regina, for the Vermilion school, 21 on the same date, S.S. Montclare, for Olds, and 24 on October 10, S.S. Ausonia for Claresholm. In each case the parties are routed through direct to the three schools. It is expected that with the British boys, the registration at the three schools of agriculture this year will run close to 400.

Great Triumph for Alberta Made Butter

Wins First Prize at London Dairy Show Last Week

The greatest triumph yet scored by Alberta creamery butter in competition, was recorded the past week, when it was announced from London, England, that an exhibit of Alberta creamery butter, salted, made in the plant of the P. Burns Co., at Edmonton, had won first prize and a gold medal in the colonial section of the London dairy show, one of the largest shows of ith kind in the world. This means that this exhibit from Alberta stood ahead of all other exhibits from other parts of the British Empire, not including Britain itself.

Two other exhibits from Alberta, made from the plant of the Woodland Dairy at Edmonton, and the Innifail Creamery, were given high commendation in the show. The first prize in the unsalted butter section went to the co-operative creameries of Regina, Sask.

In the colonial seution of the show Canada won four out of the six prizes offered for empire wide competition, and Western Canada took three out of the six. This means that Western Canada creamery butter is recognized in the most discriminating market in the world, as the highest quality of butter produced in any of the British dominions.

The exhibits from Alberta in the salted section were made under the auspices of the dairy branch of the Provincial Department of Agriculture which gave substantial assistance to the exhibitors in enabling them to make the exhibit overseas. It is the first time that Alberta has exhibited in the London show, and it is regarded as a unique triumph for the Alberta dairy industry that the gold medal came to this province, even beating out in competition the famous New Zealand butter, which is made under almost perfect conditions.

Naturally, there is considerable elation among dairymen over the fact that Alberta butter has beaten the product from New Zealand. The grading systems in effect in the province have had considerable to do with the rapid improvement of quality of tra butter manufactured in the plants in the province, and with this latest triumph Alberta butter is likely to be more in demand than ever in the British market, where last year a considerable quantity was sold.

Sugar Beet Factory In Alberta Opened

Million Dollar Plant Now Operating at Raymond

The official opening of Alberta's new million dollar sugar factory at Raymond, south of Lethbridge, took place on Friday of last week, with many in attendance including representativeh of the provincial government. A special train was operated from Lethbridge for the event, which marks an epoch in the development of the irrigated sections of southern Alberta. The plant expects to handle something like 90,000 tons of beets this season, and has already commenced operations. The crop in a particularly heavy one, although being harvested under adverse weather conditions. Yields ranging anywhere from ten to twenty tons of beets per acre are being realized.

BIG STOCKER SHOW HELD AT CALGARY IS SUCCESS

More than 1660 head of cattle were disposed of at the auction sale held in connection with the annual stocker and feeder show held at Calgary this week. The high price of the sale went to J. L. Walters of Clive, whose carload won the grand championship of the show, and was sold to Burns Co., at the rate of $7.10 per hundred. Mr. Walters' car of shorthorn which won the reserve champion, was sold at $7 per hundred. Savage Bros., of Big Valley received $7 per hundred for a group of five steers. A carload of 20 steers owned by Usher Bros., of Scollard, went for $6.90 per hundred.

Harry Carey will be seen in "Bad Lands" on Friday of this week and on Monday the popular Tom Mix and his horse Tony will be seen in action in "The Everlasting Whisper." Don't miss these pictures at the Cameo.

Perhaps you are using good tea. We think "Red Rose" extra good. *Won't you try it?*

RED ROSE TEA "is good tea"

The same good tea for 30 years.

What the West Means to the East

Western Canada's 1925 crop should have the effect of finally convincing Eastern manufacturers, wholesalers and financiers how largely their success and prosperity is bound up in the progress and prosperity of the agricultural producers of the West, and should open their eyes to the fact that Eastern approval and support of those essentially Western undertakings and policies to further develop and increase our farm production and wealth will result in still larger business and dividends for the East. Artisans and workingmen generally throughout Eastern industrial centres should become seized of the same knowledge.

In a review of the business outlook in Canada, The Financial Post, Toronto, says of Ontario: "Wholesale houses feeling effect of much keener demand from Western Canada and look for excellent business this Fall and Winter in basic lines. Industry speeding up 100 per cent. and over in many cases. Decided falling off in unemployment." In Quebec, it is stated, "very little unemployment exists." In British Columbia "huge building projects are under way, including grain elevators" and "basic industrial conditions are improving gradually." In all provinces the agricultural position is reported better than for many years.

Thus both to the east and the west the effect of prairie production is felt and bringing about marked improvement in the industrial and economic life of the country. Concrete evidence of this betterment is found in the fact that whereas a couple of years ago the Massey-Harris factories were more or less idle, they are now working day and night with full staffs in an effort to fill orders, and the stock of the Company is quoted at a figure double what it was at the beginning of the year; Sawyer-Massey stock has more than doubled since February, while Cockshutt Plow has recorded a 30 per cent. advance.

Analysing operating results for the first five or six months of the year, a Wall Street financial journal recently hazarded the opinion that the C.P.R. would not earn its full ten per cent. dividend this year, but improving business throughout Canada resulted in the railway enjoying the best July since 1917, August maintained the improvement, and with the Western crop now moving and business generally speeding up as a result, both the C.P.R. and C.N.R. are expected to make a splendid showing for the year.

The head of a Western trust company announces as a result of improved conditions his company has disposed of more farm lands in the past five months than in the previous five years. The Hudson's Bay Co. sold more than double the acreage in the first six months of 1925 as compared with the same period last year. An official report of the United States Bureau of Immigration states that the number of farmers settling on the Canadian prairies from a large portion of the United States is fifty per cent. greater than for last year, and that the two railway companies and the Hudson's Bay Co. have sold more land in Western Canada than in any similar period for ten years.

The significance of these things should not be lost upon the people of Eastern Canada. There is hardly any limit to the wealth producing power of Western Canada, but those responsible for that production continue to labor under certain handicaps which ought to be removed, and can easily be removed if the people of the East will but take a large national view of the policies and undertakings involved, as, for example, an equitable readjustment of freight rates east and west, and the early completion of the Hudson Bay Railway. Anything that will add to the purchasing power of the West, and give a further impetus to its settlement and development, will mean a further large increase in industrial development and prosperity east of the Great Lakes.

No part of Canada stands to suffer quite so much or so quickly from depression in Western agriculture as the provinces of Ontario and Quebec. If the West remains handicapped, its development will suffer and the people here will not reap the full reward of their labor. But they will make a living and can hang on. But if the necessary business is not forthcoming to keep their wheels turning and their man-power employed, Eastern factories have no option but to shut down and throw their employees into the ranks of the unemployed. The latter must then emigrate to newer and more promising fields.

Development and prosperity in the West means the hum-of activity in Eastern industrial centres. The 1925 Western crop is demonstrating this to be true. The East should bestir itself in its own interests and support those policies and undertakings which will assist to make such a condition as nearly permanent as human agencies can make it.

Manitoba Poultry

Three Carloads of Live Poultry Shipped to Eastern Points

Three cars of live poultry have been shipped recently from the southern half of the province by the Manitoba Co-operative Poultry Marketing Association, states A. C. McCulloch, Dominion livestock branch poultry promoter. The birds were shipped in special cars with eight decks of coops, a centre aisle and storage for eight barrels of water and half a ton of grain. One car was shipped to Montreal and the other two to Buffalo.

Odd House Needs Owner

Structure in Shape of Flatiron Built in Seattle

A house five feet nine inches wide at one end and 16 feet at the other was built on a lot 40 by 120 by 15 feet in Seattle this summer by A. B. Wark, contractor. An ordinance requiring the house to be in line with others on the two streets it faces was the reason the structure took the shape of a flatiron, Wark said.

The dwelling contains three fan-shaped rooms. In the rooms a disappearing breakfast nook, a reading bed and a vanishing ironing board were installed. The basement has a combination laundry and garage.

Wark said he was trying to find somebody the house would fit so that he could sell it.

Montreal's Population

Greater Montreal's population is now estimated at 1,028,000, according to the 1925 issue of Lovell's Montreal Directory just published. Population of the city proper is estimated at 907,500. Population in the suburbs and surrounding country is given as 120,500. The last estimate of Greater Montreal's population, by the same authority, gave the population as 879,027.

Big Crowd At Tennyson's Home

The biggest gathering of Tennysonians ever held in England met at Aldworth recently to visit the poet's old home in the Surrey hills. This is built on a hill near Haslemere and is now occupied by the Gatkwar of Baroda, at whose invitation the members of the Poetry Society journeyed to the poet's cottage.

Genuine BAYER ASPIRIN

Say "Bayer"-Insist!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians for 25 years.

Plans Flight From London To Cape Town

British Airman Made Flight To India Last Year

Alan Cobham, Great Britain's long distance airman, is going to attempt a London-Cape Town flight in November.

His route will be Paris, Lyons, Pisa, Brindisi and Cairo, the course thereafter to be governed by local conditions.

Cobham hopes to reach Cape Town early in December and return to London the same month. Last year Cobham, who is thirty-three years old, completed a 17,000-mile flight to India, carrying as a passenger Sir Sefton Brancker, the air vice-marshal. He proposes to use the same type machine as the DH50 in his flight to Africa.

Mothers' Best Friend In Rearing Children

Pain and sudden sickness are apt to come upon us at any time and safety lies in having always handy on the shelf a reliable pain relief like good old "Nerviline." For nearly half a century Nerviline has been a family standby, and most mothers have come to rely upon it in case of colds, sore throat, tight chest, sprains, cramps, nausea and sudden attacks of sickness at the stomach. For internal or external use, Nerviline is worth its weight in gold in every home, and costs but 35 cents at any dealers.

Considering Plan For Rigid Dirigible

Secretary of U. S. Navy Receives Suggestion From Ford

A suggestion by Henry Ford that the navy department build and experiment with a rigid dirigible designed by his engineers is being given serious consideration by Secretary of Navy Wilbur.

Mr. Wilbur has asked the bureau of aeronautics to examine the plans of the airship, which were submitted by Mr. Ford's engineers.

It is proposed that the ship be 150 feet long, 50 feet in diameter and have a metal gas bag. The cost of one dirigible was placed approximately at $300,000.

The dirigible would have a speed of 70 miles an hour and a cruising radius of 2,000 miles.

A GRATEFUL LETTER

From a Lady Made Well by Dr. Williams' Pink Pills

"I wish from my heart I could persuade every person who is run down in health to give Dr. Williams' Pink Pills a trial." Thus writes Mrs. Louie Mitchell, Oak Point, Man., who further says:—"About a year ago I was a weak woman, suffering from a run down system and impoverished blood. Any little exertion would cause my legs to tremble and my heart to throb violently. I could not sweep a room or walk fifty feet without being exhausted. About I began taking Dr. Williams' Pink Pills, and after taking only six boxes I am as well and strong as ever. I can walk and run without stopping every few seconds gasping for breath as previously. Dr. Williams' Pink Pills will be my stand-by in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to anyone needing a tonic."

There are many troubles due to weak, watery blood which can easily be overcome by a fair use of Dr. Williams' Pink Pills. The sole mission of this medicine is to enrich and purify the blood and when that is done all the varied symptoms of anaemia disappear, and good health returns. You can get these pills through any dealer in medicine or by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Holds Highest Record

A Worcestershire woman has lived eighty-five years in one house. Her record is taken by John Hallam, of Hatton, England, who died in his ninety-fifth year in the house in which he was born. He had lived in it all his life.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Oldest Cigar Store

Lancaster, Pa., claims the oldest cigar store in America. It has been in the Demuth family since 1770. The store is a treasure house of relics. It contains the first bathtub in Lancaster County, more than a century old.

May Become Apartment House

Italian Engineer Plans to Make Eiffel Tower Greatest Skyscraper

The Eiffel Tower, in Paris, which today supports what is claimed to be the largest and grandest electric advertising sign in the world, would undergo still another change into something perhaps even richer and stranger if the ideas of M. Carlo Castiglione, Italian engineer responsible for the installation of the present electrical apparatus, were adopted.

What he proposes is that the Eiffel Tower should be converted into a sixty-six story apartment house for the special benefit of tourists.

The new building would be constructed by erecting cement walls about the present structure, and could easily be fitted out with all modern appliances. The floor space would be let for offices as well as for apartments and rooms, and the result would be the greatest skyscraper in the world, promising for the municipality of Paris a tremendous source of revenue. These are the views of M. Castiglione, who has said that the plans for the building are in preparation and when completed will be submitted to the proper authorities.

Asthma is Torture. No one who hasn't gasped for breath in the power asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvellous preparation. Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

British Government Aids Women Flyers

Big Grant For Club Which Has Six Women Members

Flying as a profession has been recognized by the British Government as being well within the capabilities of women and a club already has been formed to carry out the air ministry's scheme for a light aeroplane organization for London with members of the fair sex. In connection with the opening of the Stag Lane Airdrome at Edgware, near London, by the London Aero Club, of which six flying members are women, a move has been made with the object of training pilots who will be specially employed in an air force for protecting the capital from enemy raiders in the event of war with nearby powers.

The air ministry has agreed to provide the club with £20,000 worth of equipment and a grant of £1,000 for upkeep, and has promised more money as it is needed. It also will give £10 for every certified woman pilot trained by the club.

Heavy Grain Exports

15,000,000 Bushels of Wheat Were Exported in August

More than fifteen million bushels of wheat were exported from Canada in August as compared with 13 million in August last year. Of the amount exported, 10,972,000 bushels went to the United Kingdom and 3,-986,000 bushels went to the United States ports. The shipments via U. S. ports showed a marked increase over August last year when only 2,284,000 bushels went through American channels. The wheat flour exports for August totalled 684,618 barrels as compared with 626,215 barrels.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the human child intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Absolute Failure

One of His Majesty's inspectors of schools in a Scotland city had been testing the children of a very slummy district for admission to an institution for the mentally defective. Walking homewards through a narrow street he overheard this poignant comment on his day's doings: First lady on the doorstep: "What's wrang wi' ye, grannan? Ye're that glimphy the day." Second lady on adjacent doorstep: "Oor Jeanie was examined for an idiot, an' she didna pass!"

Ask for Minard's and take no other

Agricultural Experts Visit

Agriculturists From U. S. Make Study Of Soil Conditions Here

One of the most important parties of agricultural experts to visit Western Canada spent several days in Edmonton, Alberta, and district recently. This party of experts of the United States department of agriculture are making a survey of soil conditions in Western Canada for the purposes of soil maps. The party included Dr. C. F. Marbut, in charge of soil surveys for the United States Government; L. H. Santz, in charge of the bureau of plant industry; C. H. Hall, cerealist of the United States Government; O. E. Baker, agricultural economist of the United States department of agriculture; and R. L. Clemeteel, assistant in the bureau of plant industry.

Mount Shasta Becoming Active

Volcano In California Causing Alarm To Residing Citizens

Mount Shasta's rumblings are causing some alarm among the citizens of Redding, Cal., and it is feared the volcano is ready to break out into active eruption. Investigations by the United States bureau of fisheries show the water of the McCloud River is four degrees warmer than normal; that the surface of Mount Shasta is warmer than usual; that the mud flow is increasing, and that grass is dying in meadows much earlier than usual. Heat in the depths of the mountain is believed to be the cause of the peculiar conditions.

Amundsen Will Use Dirigible

Norwegian Explorer Will Again Attempt Flight Over North Pole

Captain Raold Amundsen's next attempt to fly over the North Pole will be made in an Italian dirigible, it was confirmed by the commissariat of aeronautics. The dirigible, the N-1, which has been ceded to the Norwegian explorer expressly for the Polar flight, will be operated by an Italian crew. The conditions of the cession by the Italian Government have not been made public, but it is not believed the explorer purchased the airship outright, since Italy is to share in the honors of the flight by furnishing the crew.

It will fly the Norwegian flag.

The dirigible termed a dirigible, it is not of the zeppelin type, but is semi-rigid. It has a capacity of 19,000 cubic meters; is 106 meters long, and 26 wide (about 347 by 85 feet) and is equipped with three motors of 240 horse-power, capable of developing a speed of about 62 miles an hour with a cargo of eight tons.

Largest Carpet In World

Sixty-four Oriental Rugs Woven Together Weigh Over 21 Tons

Weighing over twenty-one tons, a carpet has recently been laid down on the floor and restaurant of one of London's leading hotels.

It covers a floor space of half an acre. Seventy men were required to handle it, and it is believed to be the largest piece of its kind.

For the first time in the history of carpet making sixty-four Oriental rugs were woven together. Sixty-two came from Persia and two from China. The weaving was done by rug workers from Samarkand.

According to their customs the workers before the growing carpet was allowed to encircle each rug, wove their prayers and rice fibre crescentwise into the heart of it, to ensure that all who tread them shall know perpetual joy and felicity.

It will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which precedes ulceration and inflammation, a spoonful of Dr. Thomas' Eclectric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to colds have found it made themselves immune to attack.

May Revolutionize Industry

Scientist Claims Concentration of Electrical Energy in Small Object

A scientific discovery that may have a revolutionary effect on industry is claimed by A. F. Joffee of the Academy of Science.

Experimenting in his own laboratory, Joffee says he succeeded in obtaining a tremendous concentration of electrical energy in a very small object. The accumulator, which he constructed and charged with energy "sufficient to drive the most powerful motor car for ten days," is small enough to go into a waistcoat pocket.

Tribute To Genius

Hitherto honored only for his ability as a composer and artist, Walter Damrosch, conductor of New York Symphony Orchestra, has received the following note as proof of his genius:

"Will you kindly call to tune my piano?"

Be a Shining scholar with 2 in 1 Shoe Polish On your shoes

Saskatchewan Game

Huge Bag Secured By Nimrods Last Season

A bag of 154,500 ducks, 45,000 prairie chicken, 13,500 partridge and 5,500 geese, was secured in Saskatchewan by 5,222 sportsmen, who have complied with the requirements of the Game Act by filling out and returning the coupons attached to the game licenses. Over 10,000 hunters failed to make returns. Assuming that these defaulters shot on an average as many birds as those who returned their coupons, the total bag secured would be 618,000 duck, 180,000 prairie chicken, 54,000 partridge, and 22,000 geese.

STIFFNESS of any kind can be quickly relieved by massaging with MINARD'S "KING OF PAIN" LINIMENT

Germany Has New Idea

Increase Dog Taxes to Raise Funds For Opera

In order to support the opera and make up opera deficits, the Fathers of the City of Berlin have proposed an increase in dog taxes from $10 to $15. According to Berlin's present canine population, the tax increase would swell the treasury by $1,500,000 yearly, they point out. "It is a question whether raising a dog or attending the opera is more cultural," says one paper, which further proposes adding another political party to the score or more now existing, and make a lower dog tax the party platform. "Love my dog if you want my vote," is suggested.

TEETHING BABIES Thousands of Them DIE EVERY SUMMER

The hot weather is very hard on babies starting to cut their teeth.

On the first sign of any looseness of the bowels the mother should give a few doses of

D.E. FOWLER'S EXT-OF WILD STRAWBERRY

This will quickly effect the diarrhoea, vomiting and purging, and, perhaps save the baby's life.

Put up only by The T. Milburn Co. Limited, Toronto, Ont.

Many Women Leaving England

According to official figures just made public, 10,500 females, wives or housekeepers, left the British Isles for British North America last year and 6,000 went to Australia. Over 10,000 males migrated last year to British North America to engage in agricultural work.

The total number of emigrants from the British Isles in 1924 to other parts of the empire was 115,600.

Tobacco Poisoning

Nicotine Poisoning Causes Many Deaths Each Year

Nicotine poisoning causes many deaths each year, according to Dr. Harvey W. Wiley, chief of the bureau of chemistry, United States department of agriculture. Dr. Wiley has been conducting experiments with tobacco for the past two years.

"Nicotine is a deadly poison," he said. "Many persons have died from it. Some have died from eating tobacco, others from smoking it. Nicotine is a deadly poison to the heart, and it is a deadly poison to the nerves. Tobacco is a habit that is hard to break, but it is a habit that should be broken."

Dr. Wiley said that he had found that the nicotine in tobacco is not destroyed by smoking, but that it is carried into the smoke and thus into the lungs of the smoker.

Keep Minard's Liniment in the house

With Better Business Conditions Some Movement Again Manifest To Utilize Western Resources

(By John Sweeting, Industrial Agent, C.P.R.)

A continuation of improved business conditions is shown throughout the western provinces with very distinct prospects in the growing volume of purchases as the fall and winter trading proceeds. With the good average crop, the employment of surplus labor and approximately the same third quarter construction programme, the situation should be maintained, and, as a matter of fact, should produce a more stable condition on which to calculate winter business. There is every foundation for suggesting that the coming winter's trade will be better than the average over the last few years.

There is some movement again being manifest to utilize western resources; two or three of the gypsum deposits of B.C. are being developed and a new plaster plant under construction at the coast. A plant is to be erected in Southern Saskatchewan to manufacture brick, tile and pottery-ware, and investigations being carried out in Alberta to utilize straw waste in the manufacture of various straw board products in addition to proposals in Manitoba to produce paper from a similar raw material. The growing of hemp for its fibre and marketing as such is being carried out in Manitoba, together with some experimental fields of fibre flax with a view to encourage its growth in the lake districts north of Winnipeg. Additional processes are being investigated, looking to the briquetting of the lignite coals of Saskatchewan, and the pulpwood areas of Manitoba are being requisitioned to take care of the pulp and paper plant which is to be erected on the Winnipeg River. The salt deposits in the McMurray district are under commercial development, while the bituminous sands of Northern Alberta are continuously being tested and processed with a view to ascertain proper method of treatment. Altogether there has been a pronounced activity throughout the western provinces in the development and experimental work in many lines, looking to a period which appears to be within reasonable distance, when work on a commercial scale can be profitably accomplished.

The agricultural situation in a general way is better. The position, possibilities, prospects and importance of this industry is being more fully realized, methods adapted to its more economic development are being utilized with compensating results. The incoming of new settlers into partially settled districts, together with improvements that are being steadily carried out on many existing farms, as well as the variety of products now available for market, is, and has created, an improvement in the western field, which is helping to a very large extent to bring back sanguine anticipations of success in putting the agriculturist foremost in a field which is the determining factor to the well-being of the prairies.

It is not difficult, therefore, to realize that the improvement in conditions which is and has taken place is due largely to the confidence that is being shown, and which is bringing about increases in trading, opening up of resources, construction of power plants and new factories, and tending to interest outside capital to further investigate western investments. The more difficult period, which necessitated heavy retrenchments, appears to have been overcome, opening up for present and future consideration a programme of expansion which should develop without undue hindrance.

Wheat Exports Higher

Big Increase In August Wheat Shipments Over Last Year

More than 15,000,000 bushels of wheat were exported from Canada in August last year. Of the amount exported last month, 10,972,000 bushels went to the United Kingdom and 8,-925,000 of that amount went via United States ports. The shipments via United States' ports showed a marked increase over August last year, when only 2,284,000 bushels went through American channels. The wheat flour exports for August totaled 684,589 barrels, as compared with 636,213 barrels.

A wife certainly has no cause for complaint if her husband doesn't love any more—provided he doesn't love her any less.

Stassfurt, Germany, has a potash mine where men work 2,600 feet underground at a temperature of 104 degrees Fahrenheit.

Too often a fellow's charity seems to be glued to his fingers.

University Gets Burbank Garden

Plant Wizard Offers It For Half Its Value

The gardens in which Luther Burbank, world-famed plant scientist, for fifty years has conducted his experiments, near Santa Rosa, California, are to pass into the hands of university scientists for maintenance and perpetuation.

Indications are that Stanford University will get the gardens since Burbank favors that institution and offers to place his treasured gardens in its keeping at half their valuation, the sum to be determined by a friendly committee.

Stanford has had open competition from a half-score of eastern and mid-western universities as well as two Pacific coast institutions and numerous capitalists seeking to commercialize the achievements of the plant wizard.

Burbank himself was reticent concerning the identity of these institutions, but from W. Lambert Hill, personal friend of the scientist and one of the chief sponsors of the endowment plan, it was learned that one of these was "probably Harvard." Hill said private capital had offered as high as a quarter of a million dollars for Burbank's gardens. This and other offers were refused by Burbank, he said, because the scientist did not wish to "commercialize" his fifty years effort.

Two other offers of $100,000 and $150,000 were made by private financiers, Burbank admitted.

Burbank does not intend to retire for he is in the best of health, but would devote his time to his office duties and advising scientists who would take over his work.

Honey Industry

Very Rapid Growth Shown In Western Provinces During Recent Years

The honey industry has experienced a very rapid growth in the western provinces during the past few years. In 1920 the value of output only amounted to about $85,000, while the production for the past year is estimated to be worth close on $400,000. Manitoba records for 1924, 1,800 beekeepers with 27,113 colonies and a production of 1,302,000 lbs., with a value of $195,300. The unseasonable climatic conditions in the province during the past year had a very adverse effect on the industry, as this province produced over $400,000 worth of honey during 1923 and 1924. Last year Saskatchewan had an output of 77,000 lbs. of honey, worth $18,053, representing the output of 2,000 colonies. This is a record output for the province, the previous record having been made in 1923, when 21,657 lbs. of honey, valued at $5,473, were produced. The number of keepers in Alberta is estimated at 160, while the production of honey last year amounted to 55,000 lbs., of the value of $13,000. British Columbia reports a production last year from 14,604 colonies of 670,592 lbs. of honey, valued at $149,443. This is the second greatest production ever recorded by the province.

To Curb Forest Fires

British Columbia to Extend System of Fire Outlook Stations

The British Columbia forest service is planning to extend its series of fire outlook stations so that eventually every important timber area in the province will have an observatory. Five lookout stations are already established and the department is now planning a station on Mount Benson, which will leave a wide area near Nanaimo and another for Phoenix Mountain near Cranbrook.

Alberta Oil Wells

The No. 4 Royalite well (Imperial), continues to amaze geologists. Its naptha production increased July to 546,135 gallons, 72 degrees Beaume, an increase of 25 barrels daily over the June production. The production continues to increase and the flow of gas at 20,000,000 cubic feet a day is being maintained. This flow will shortly be harnessed to supply Calgary.

Crude Oil Production

A decrease of $64,618 in value is shown for last year's production of crude petroleum in Canada as compared with the previous 12 months. The output for last year, according to revised statistics, amounted to 160,772 barrels, valued at $467,490, while in the preceding 12 months the production totalled 170,169 barrels worth $532,018.

Saskatchewan Poultry Pool

Organization Will Not Operate Until Objective is Reached

The objective of one-third of the exportable surplus of poultry and poultry products was not secured by the Saskatchewan Egg and Poultry Pool up to September 1, and therefore the executive have decided not to operate the pool at present.

It was decided to immediately launch an intensive campaign in 163 rural municipalities where the sign-up was greatest. Contract signers will be given two weeks from September 17 to withdraw, but it is pointed out that unless the required quota is secured the pool will not operate.

Five field organizers will be sent out almost immediately on organization work and these men and women will appoint an organizer in each of the 163 municipalities. Hitherto the work of organization has been conducted on a voluntary basis, but the municipality organizers will now be paid on a commission basis.

To take care of overhead expenses it was decided to raise the objective in the 163 municipalities to 45 per cent. of the exportable surplus. As soon as this has been secured the pool will establish three collecting points and start to operate.

Prosperity In the North

Mining and Lumbering Is Active in Northern Manitoba

The biggest mining and lumbering developments in years are looming in Northern Manitoba, according to R. W. McKinnon, commissioner for the territory. More men have gone into the Elbow Lake and gold mining districts this season than at any time during the past five years. The lumber mills of The Pas will exceed their previous record cut by 10,000,000 feet. More American money has been available for developments in the western part of the field, Mr. McKinnon stated, the new interest being the result of the Canadian Pacific Railway survey.

Just Idle Speculation

The blueberry crop of the Canadian northlands is worth millions. Every year it goes unharvested. Greenland's icy mountains would be valuable in New York and London ice boxes. If we had enough dinosaurs we could hook the market in hens' eggs. But all this is idle speculation.—Ottawa Journal.

Russia Endeavors To Protect Wild Life

Has Established Animal Sanctuaries and Wild Life Is Restricted

Hunting is still of considerable economic importance over large parts of Siberia, particularly in the tundra and the forest regions. In some localities it is the chief means of livelihood, while in others it supplements fishing and farming. Sparse population favors the survival of fur-bearing animals, but the supply is decreasing as the country becomes more thickly settled. In consequence of the increase in the number of hunters and the more intensive methods of hunting, furbearing animals are killed faster than they multiply.

This destruction has led the Russian Government to restrict the hunting of wild animals and birds. Animal sanctuaries have been established. It is difficult, however, to enforce hunting laws over such a vast territory inhabited by so primitive a people.

Canadian Horses Shipped Abroad

Endeavoring to Open Up New Market For Canadian Horse Breeders

A policy, designed to open up new markets for Canadian horse breeders, has been inaugurated by the Dominion department of agriculture, which has collected 50 head of horses and will ship them to Europe, where there is a good market, according to present reports. All charges will be paid by the department; records will be kept, and when the horses have been sold it will be known exactly what profit, if any, was made. It is years since there has been any export trade in horses.

Improve Vancouver Grain Port

Increasing Capacity of Elevators and Vessel Loading Facilities

Many changes and improvements have been effected in the capacity and equipment of the grain elevators and vessel loading facilities of the port of Vancouver during the past season, in anticipation of handling a record volume of Western Canadian grain during the coming winter season. A recent survey shows that the port now has seven grain elevators, with a total capacity of 6,500,000 bushels. Grain loading berths number thirteen.

The story of William Tell, hero of a Swiss legend, is in its main features common to all Aryan peoples.

Unique Feat by Round the World Golfer

Here is the golf ball that was played around the world by I. O. Upham, who looks quite unconcerned as he poses with his famous ball in his hand. Mr. Upham is a member of the San Francisco Golf Club and of the Issas Upham Company, also of San Francisco. Wonder who will be the next to chance his ball around the world? There's a box of $50 that started Mr. Upham teeing-up in foreign countries, playing one hole on every course with the same ball. At Taingtau disaster nearly overtook him. His ball rolled into a ditch, but after twelve men had looked for it, it was found two hundred feet away from the place where it had disappeared. The day war was declared, Mr. Upham played on the Hermitage Park and Gold course in Copenhagen, where the chief hazards were deer which had to be shooed off the putting greens. Next day he went Lock for another game and found the entire park occupied by the Danish mobilized army, 10,000 strong. At Braid Hills, outside of Edinburgh, he was able to play until 10 o'clock in the evening without losing his ball. Before returning to San Francisco, Mr. Upham had played 50 courses. Now he is looking forward to meeting in China the Round the World Golf Club, which leaves New York, December 3rd, on the Empress of Scotland, its members hoping to be able to follow successfully the example set by Mr. Upham.

The Economic Benefits Which Canada Will Reap From Completion Of H. B. Road

Story Of The Colorado Potato Beetle

Monograph Prepared By Entomological Branch of Department of Agriculture

Four members of the staff of the entomological branch of the Dominion department of agriculture, have united in writing a monograph of the Colorado potato beetle in Canada. These members are Arthur Gibson, Dominion entomologist; R. P. Gorham, assistant entomologist at Fredericton, N.B.; H. F. Hudson, assistant entomologist at Strathroy, Ont.; and J. A. Flock. This monograph, which is styled Bulletin No. 53, new series, and can be had free on addressing the Publications Branch, Ottawa, shows that the beetle was first noticed at Windsor, Ont., in 1870 and since then has spread pretty well all over the country. It swarmed across the Detroit River in the first instance, and soon was found in many parts of Western Ontario. In 1873, all but the northern part of the province had experienced a visitation. In 1874 the beetle was observed in Quebec; in 1878 it had made its appearance in New Brunswick; in 1879, in Manitoba; in 1881, in Northern Ontario; in 1899, in Alberta, and in 1901, in Saskatchewan. In the west its spread was very gradual, its presence in any numbers not being reported until recent years. It was first found in British Columbia in 1919, having been introduced, it is supposed, from the state of Montana. The bulletin, which is a publication of thirty pages with illustrations, describes the nature and habits of the insect, its method of life and breeding, natural control factors, and artificial control, the last of which is possible by spraying or dusting with insecticides, which are prescribed.

Caring For the Farm Tools

Farm Implements Should Be Put Under Cover During the Winter Months

The crop of 1925 will soon be secure against weather conditions. Grains and root crops, hay and ensilage will be ready to turn into money, either by means of feeding to livestock or direct sale. The farmer can then commence to ease off slightly. There is one thing, however, that should be given attention. Have the plow, the harrow, the mower, or the many other farm implements been put away where they will be protected against the rains and snows between now and next spring, or—if they will be required again? The other day in a short trip made by a member of the staff of the natural resources Intelligence service of the department of the interior, it hurt to see farm implements that had cost the farmer good money were left in the corners of the fields where they had been last used. Much of the farmer's hard work was represented in the value of the implements, and it did seem a pity to see so much human energy wasted. Next spring, when activity again reigns in the development of Canada's greatest natural resource—the land—someone may have to go without what he would like to buy because the money is needed to replace a neglected plow or some other implement. It would be much more satisfactory to have the present plow in good condition and save regrets.

It is regretable the waste that is taking place in valuable farm implements, and it is suggested that each and every farmer give this matter attention, and pass the word along to "save the farm implements."

The Breeding Of Turkeys

How to Select Good Breeders for Building Up Flock

Turkeys intended for breeders should be selected early in the autumn before fattening for market takes place, says Mr. A. G. Taylor, of the poultry division of the Dominion experimental farms. Well matured birds and only those possessing good constitutions and vigor should be selected. Quality of bone should not be overlooked. The largest birds need not of necessity be chosen, but the small ones are not desirable as breeders. Take care to choose birds that are free from disease and males unrelated to the females. A good start, adds Mr. Taylor, can be made in Turkey raising with one male and four females. If the male is a good vigorous bird the number of females can be increased.

Don't confine them to the house during the winter, but allow them to roam at will during the day. The only shelter required in the night is a straw barn or closed-in shed. Never house turkeys with hens or in heated houses.

The completion of the Hudson Bay Railway will mean lower grain rates, a large immigration who will arrive in the west by the bay route, development of the vast mineral and power resources of the north country and greatly enhanced land values in Western Canada, according to Clarence F. Graham, a director of the On-To-The-Bay Association and an advocate of the Hudson Bay route for over forty years. In an interview with the Saskatoon Star, Mr. Graham said:

The economic benefits which Canada will reap from the completion of the Hudson Bay Railway and the opening of the short route to Liverpool were outlined in an interview by Clarence F. Graham, a director of the On-To-The-Bay Association here, who has fought for the northern route since the early eighties and who is probably personally responsible for interesting more influential persons in the project than any other living man.

"The announcement that the Hudson Bay Railway will be completed," said Mr. Graham, "will be secondary in importance only to that of Sir John Macdonald in 1880, that a syndicate of capitalists was prepared to undertake the construction of the Canadian Pacific Railway and had signed a contract to that effect, implying the linking up of British Columbia with Eastern Canada, and thus fulfilling the most outstanding of the conditions under which British Columbia entered Confederation."

Mr. Graham expressed the firm conviction that ultimately the Hudson Bay route will be navigated the full twelve months of the year.

"What are the prospective results from the opening of the route, Mr. Graham was asked. "Those apparent are too numerous to be covered in an interview," was the reply, "but some may be mentioned. Transportation rates on all export grain will be materially lowered. The export cattle industry will be placed on a permanently profitable basis, not only because the total mileage, to say, Liverpool, will be lessened, but in addition the proportionate rail haul will be greatly reduced. As is commonly known, the rail haul is what 'shrinks' the cattle. On the other hand, the sea trip via Hudson Bay will be cool and live cattle should undoubtedly arrive at the Old Country market in splendid condition, with correspondingly greater returns to the shippers.

"The bay fisheries will then come into their own, and fresh salt water fish will be an ordinary article of diet in prairie homes.

"It must not be forgotten that there is that waterpower available tributary to the Hudson Bay Railway. With the rapid development of the country it is unbelievable that this will not be utilized, and distributed over a vast area by high tension lines, as is now being done in Ontario.

"The mineral wealth tributary to the Hudson Bay Railway will become widely known following the opening of the route.

"While immigration to Canada from Great Britain and Europe will undoubtedly be stimulated, fully as important will be the surge of prosperous people from the United States. The large American land owning companies, armed with the slogan, 'Hudson Bay Route Being Opened' will resume the activities which were stopped by the war, will be able to kindle the enthusiasm of Americans, and an influx of experienced desirable farmers from the United States will result.

"An immediate enhancement will be enhanced farm land values, and their consequent greater value as security for financial purposes. Within a maximum of five years from the opening of the bay route, it will be conservatively credible that good farm lands were available at the prices of 1925.

"Inevitably the west, with its rapid increase of population, will have the balance of political power.

"Just as the Canadian development which followed the construction of the Canadian Pacific Railway surpassed the expectations of its most zealous advocates, so will that following the opening of the Hudson Bay route exceed all present forecasts.

"These are some of the things we may with confidence expect from the opening of the northern outlet," said Mr. Graham in conclusion. "It will transform Western Canada."

Family of Women Without Nails

A family of women without fingernails or toe-nails was discovered in Italy recently by a scientist. For three generations no woman in the family has had a full-fledged finger or toe nail. In every other way the women are normal and healthy.

Nothing jars a man like being compelled to love by contract.

THE ELECTION

BY the time this issue of the Review reaches its readers the election will be over and have passed into history.

Although we are holding the Review over for a day in order to be able to give a summary of the result as nearly as it is possible to do so the day following the election, yet at the time of writing this article there is no telling with any degree of accuracy what that result will be. However no matter what way it goes it is to be hoped that the heat of the campaign has left behind it no ill effects.

So far as the contest locally is concerned it has been carried on in a most friendly manner. The more active of all sides appear to have been sincere and conscientious in their contentions. At the same time there was a very noticeable apathy, indifference and lack of knowledge of the questions of the day on the part of a great number at the beginning of the campaign. The interest, however, improved as the contest advanced and the three candidates had addressed meetings here.

The election is now over. The people have given their verdict. Let us all get down to business again and help bring about the better times which all parties claimed would follow their election to office.

OUR CANDIDATES

SINCE our last issue three political meetings have been held in town in the interests of the three candidates in the field. H. C. McDaniels had a meeting in Cliff hall last Thursday evening, although it was poorly attended those present were very much impressed with the sincerity of Mr. McDaniels' appeal to the electorate. He gave one the impression that he is a plain honest man, advocating what he considered was in the interests of those in whose particular interests he was running. The same can be said of the other two candidates both of whom, however, took in a wider field and advocated policies which in their opinion were more concerned in the general welfare of all classes in the Dominion.

Apart from their policies and the parties which they represent it can safely be said that this constituency was extremely fortunate in having three splendid types of men as candidates. No matter which one has been elected, it can safely be felt that he will conscientiously do his duty at Ottawa.

THE PHILOSOPHER'S NOTES

The Soul is a terrible reality. It can be bought and sold and bartered away.

Pain is the Lord of the World, nor is there anyone who escapes from its net.

It is only the sacred things that are worth touching.

Nowadays people know the price of everything and the value of nothing.

We live in an age when unnecessary things are our only necessities.

Where there is no exaggeration, there is no love, and where there is no love there is no understanding.

There are moments when art attains almost to the dignity of manual labor.

Life is not a speculation. It is a sacrament. Its ideal is love, its purification is sacrifice.

Here and There

In the last fiscal year 3,843 homestead entries were granted in the Prairie Provinces, aggregating an approximate area of 614,880 acres, while, in addition, 710 soldier grants of 113,600 acres, make up a grand total of 728,480 acres so settled.

In 1915 Canada exported no wheat to China. In 1918 she sent only eight bushels to Japan. In 1924 China imported over 5,000,000 bushels of Canadian wheat and over 1,500,000 barrels of flour, while Japan took 7,000,000 bushels of wheat and 110,000 barrels of flour. It is predicted these figures will be well beaten for the current year.

The Grand Challenge Cup, emblematic of the First Aid Championship of the entire system of the Canadian Pacific Railway, will be competed for at the Place Viger Hotel, Montreal, November 15. The champions in a knock-out competition among Eastern and Western teams respectively, will fight it out for the trophy.

Plans are already being laid to make the 1925 Eastern International Dogsled Derby an even greater success than in any previous year, and it is reported that the prize money will be considerably increased next winter, with the object of attracting more teams and mushers from the West and the United States.

Fire Prevention Week, October 4-10, was observed throughout the Dominion, and to mark the sense of the importance of the occasion Mr. Grant Hall, vice-president of the Canadian Pacific Railway, broadcast an appeal by wire to every officer and employee of the system "to cooperate as in the past and set a good example by thoroughly cleaning up all premises."

Canada's great outlook, says a recent issue of the London Outlook, is that she wants more people, but of the right type, namely, steady agricultural workers with enterprise, initiative and endurance. Enthusiastic letters from emigrants under the joint scheme of over 3,000 families in Canada are bound to have their healthy effect on relatives and friends dissatisfied with their lot in England.

E. F. L. Sturdee, general Passenger Agent for the Orient of the C.P.R., with headquarters at Hong Kong, has been appointed Assistant General Passenger Agent of the system at Montreal. His duties commenced here in October. He was relieved of his other work owing to ill-health, but the climate of Canada soon restored him to physical well-being. He has a long record of service with the C.P.R., dating back to his first appointment at Saint John in 1894.

Sixty bushels of wheat at every tick of the clock is the rate at which the Canadian Pacific Railway have carried the grain into the elevators this season. To keep up this unprecedented rush, it has been necessary to move one car-load of grain out of Winnipeg at every one minute and twenty-three seconds of the twenty-four hour day. Grain delivered at the head of the lakes by the Canadian Pacific in September alone would fill a fleet of 200 ships, each with a cargo of 200,000 bushels.

A very pleasing incident occurred during the visit to Montreal of Madame Maria Jeritza, world-famous operatic star. Col. George H. Ham, "Grand Young Man" of the Canadian Pacific Railway who had met the singer before, sent his felicitations in the form of a bouquet, and Madame Jeritza replied with a bouquet of roses made of sugar with the hope that his days also would be sugar-coated. She gave a one-night recital in Montreal, leaving for Toronto the following day.

Isaac Gouverneur Ogden, vice-president in charge of finance, Canadian Pacific Railway, attained his 81st birthday October 10. Mr. Ogden is as active as ever although he has spent 54 years in railway work. He joined the C.P.R. as auditor of the western division with headquarters at Winnipeg in 1881 and has been vice-president of the system since 1901. Mr. Ogden was the recipient of flowers and congratulations from his colleagues on the occasion of his birthday.

Carelessness and lack of forethought on the part of some unknown motorist at Belleville might have led to serious accidents if it had not been soon discovered that the wig-wag signal protecting the C.P.R. level crossing on the Kingston Road was out of order. Investigation showed that an automobile had driven out of its course and broken the relay case thereby cutting the electrical contact. A watchman was immediately placed at the signal until necessary repairs had been made.

The Montreal Windsor street station police team are the champions of the Quebec district in the First Aid contests held at the Place Viger hotel in that city under the auspices of the Canadian Pacific Railway. They won the contest against teams from Ottawa and Quebec and are now holders of the Gutellus Challenge Cup, emblematic of the C.P.R. First Aid championship of the province. The championship of the New Brunswick district was won by the McAdam team who competed against Saint John and Woodstock.

Canadian Products Arriving at Southampton

Upper—How the cargo is stored ready for the consignee, showing one of the new electric trucks in action. Inset—Typical British longshoremen, who handle the cargo. Lower left—Unloading cargo from the "Empress of France" at Southampton. Lower right—Canada's products arriving in England for distribution.

Apart from the importation of frozen meat, what is perhaps one of the most extensive and important branches of the trade of Southampton, England, is the import of flour and fruit from Canada and the United States. These commodities have for a good many years been arriving at the Hampshire port in steadily increasing volume, and as they are usually carried in large passenger vessels, to ensure prompt and regular delivery, the recent rapid development of liner traffic at Southampton has naturally been reflected in a corresponding growth in the imports of North American flour and fruit. So many of the big trans-Atlantic steamers have been diverted from other British ports that this movement was almost inevitable, and during the last few years developments in this connection have been very rapid. In consequence it is greatly to the credit of the Southern Railway Company that they have succeeded in so organizing their facilities in the docks that they have been able to deal with all the increased traffic which has come their way in a most efficient and satisfactory manner.

The appliances for handling cargo of this description are of the most up-to-date character, and the methods employed are such as to guarantee to the consignees of the goods the most prompt and careful despatch. As can be seen from the photographs we reproduce one of the improvements adopted by the port authorities is the transporting of goods from ship's side to shed by means of electrically driven run-about trucks, which results in a great saving of time and labor, and also reduces the amount of handling to which the goods are subjected, and so minimizes the risk of damage.

The system of road transport from Southampton Docks is also well organized, so that local consignees are excellently served, whilst the railway connections to London and the North of England are such that to quote only one example, it is possible for goods to be put on rail in the west of Canada or the United States, shipped across the Atlantic to Southampton, and be on sale in London inside 10 days. Besides boxed fruit and flour, which are shown in our illustrations being unloaded from the Canadian Pacific liner "Empress of France," bacon is another commodity which is now playing an important part in the rapidly growing import trade of the port.

Light Draying

All kinds of light draying to any part of the town will be promptly attended to.

Reviving The Spinning Industry

Women On Vancouver Island Create Interest in Handicraft

Determined to revive the good old days when handicraft and thrift went hand in hand in the Canadian home, a little band of women on Vancouver Island have succeeded in creating a widespread interest in spinning and weaving.

Among the first to give impetus to the movement was Mrs. Dennis Harris, daughter of Sir James Douglas, first governor of Vancouver Island. Coming of pioneer stock, Mrs. Harris could not sit with folded hands and deplore the passing of handicraft; she set about to teach women and girls to weave and spin. Miss Ellie Macpherson has been her first lieutenant in the campaign which is now bearing fruit.

Mrs. McVicker, at her ranch "Tisvelde," Metchosin, a few miles from the city of Victoria, went further. She acquired the only flock of black sheep in the province of British Columbia, and her Angora goats also are famous for their wool. There is a great dearth of Angora goats in British Columbia, and for that reason the mohair industry is in its infancy. The scarcity of Angoras is due to the fact that their export is prohibited both from Asia Minor and South Africa.

Mrs. McVicker started modestly with Angora rabbits but she no longer keeps these little quadrupeds. She sees the beginning of a cottage industry in the revival of spinning and weaving on the southern extremity of Vancouver Island. She specializes in tweeds, rugs and home spuns.

Canadians Have No Distinctive Accent

Out Great Variety Is Found In Different Localities

Canadians will be surprised to learn that they have a characteristic nasal twang. Just why people living in various parts of the country and speaking the same language have different accents may be difficult to explain, but it is absurd to speak of a distinctive Canadian accent.

Canada is a big country, geographically speaking, and in the course of time, as the country fills up, different localities will probably develop more or less distinctive accents, but the country as a whole will never develop one peculiar accent.

Within the area of the British Isles, less than 122,000 square miles, there are dozens of distinctive accents. It would be passing strange if Canada, with an area a little less than the whole of Europe and 28 per cent. of the total area of the British Empire, did not in the course of time develop a variety of accents.—Toronto Telegram.

Sleep Is Still Popular

Eight Hours Not Any Too Much For Good Health

It has been suggested that the growing prevalence of insomnia is a hopeful sign showing that man is arousing from unnecessary mental torpor, shaking off a habit that arose simply because the night was dark. There is no reason for the custom in this age of illumination. The depression of the persons who do not sleep because they cannot is said to be delusive. They believe they ought to sleep, therefore they are worried by their failure. It is the anxiety that does the harm. Still, the old-fashioned family physician, if there is one left in the world, will tell you that eight hours sleep is a good health recipe. With all the devices for its assassination, sleep even in New York retains a remnant of its popularity.—New York Herald-Tribune

Canadian Bond Sales

Canadian bond sales since the beginning of the current year up to August 17th, amounted in value to $247,262,635, made up of $87,776,355 government; $55,736,515 municipal; $42,486,000 corporation; and $41,763,987 railroad. These bonds have been disposed of in the following markets: Canada, $102,739,302; United States, $105,745,000; and Great Britain, $37,979,333.

Chivalrous

Willie was five years old and went to church every Sunday with some other small boys, each one having a penny. But one Sunday he went to church with his mother and when the collection was being taken up he asked:

"Ma, have you got a penny?"

"No," said his mother.

"Then take mine. I'll get under the seat."—Everybody's.

At Last

"Was the prisoner really insane."

"Not until the cross-examiner got at him."

Everybody Has Ancestors

But Few People Can Trace Pedigree Back Very Far

It is a commonplace to say that unknown and self-made men have no ancestors, but everybody has ancestors as countless as the sands on the seashore. Everybody has two parents, four grandparents, eight great-grandparents, and so on. Twelve generations give 8,190 ancestors in the course of some 350 years.

If you went back 24 generations, say to the days of Magna Charta, you would have to reckon with 33,546,240 individuals, scarcely less than the whole present population of England, and any one of them might have left a trace on your character, sanity, strength, or features.

What is known as low birth merely means obscure birth. It means that little or nothing is known about the ancestors. If you were born after the death of grandparents whom you have no mark in the world, all you know about them is what your father and mother may have chanced to tell. Ask the average man what was his grandmother's maiden name and it is very long odds that he will have no idea.

You may be surprised—perhaps ashamed—to find that the ancestry of pigs and cats had been recorded far more carefully. The pedigree of a racehorse is nearly always available for more than a dozen generations, whereas kings and queens, whose forbears gave their names to historical epochs, can rarely trace back complete pedigrees half so far.

London Has Skyscraper Stable

Well Known Firm Has Solved Horse Housing Problem

The other week, Canada and Candidate, two champion chestnut horses, walked down seventy-nine stairs from their stable beds in North London and trotted off to the horse show at Richmond.

The well known catering firm that owns Poloolus and Candidate have solved their horse housing problem by stabling their animals in a five-story building built of fireproof concrete.

A wide concrete staircase, carpeted with soft peat, leads from street to stable. Up this the horses walk to bed, and come downstairs to work in the morning. Each floor is divided into two dormitories—double rows of stalls separated by wide gangways. Here the horses feed, sleep and are groomed. Large windows give excellent light and ventilation to what must surely be one of the most remarkable stables in London.

Can Appeal To Higher Court

New Regulations for Owners of Dogs in Britain

All dogs in Britain are to get the right of appeal to a high court against the death sentence in a measure to be introduced in the House of Commons.

This will be the one clause in a bill providing that when orders are made for the destruction of a dog an appeal can automatically be made and sentence suspended until quarter sessions.

Under the present regulations an owner has no recourse if the dog is sentenced to death by a local magistrate under the dog act of 1871, and he is fined $5 a day every day the dog is kept alive.

Sir Robert Gower, M.P., sponsor of the bill, said it provides a safeguard against dogs being sentenced to death on mere suspicion.

Record For Longevity

Aggregate Age of Three Negro Sisters in Cuba Is 385 Years

All records for family longevity are believed to have been shattered by three negro sisters, the youngest of whom admits to 119 years. Their aggregate age is 385 years, says a dispatch from Havana, Cuba.

Attention was attracted to the three when the eldest, Mariana Zulueta, was committed to a home for the aged. Mariana claims to be 130 years old. A half sister, Francisca O'Farrell, says she is 115. The other sister is Justa Zulueta. They have been living in the mountains near San Jose de Los Ramos.

Zulueta is the name of a wealthy Havana family to whom the three women once belonged to as slaves.

Didn't Recognize the Place

A farmer listed his farm with a real estate company. A week later the firm advertised it for sale. They so elaborately described the place that the farmer didn't recognize it as his own. Deciding that it was exactly what he wanted, he visited the real estate office inquiring about it. On consulting the list, the clerk discovered that was the customer's own farm. When told this, the farmer said: "Wal, I don't care to sell at all now."

Bright boys and girls are better developed physically than less intelligent children, according to recent tests.

Store Cattle Trade

Shipments of Livestock to Great Britain Is Increasing

The British embargo against Canadian cattle was removed on April 1, 1923, and the question then arose as to how they should be shipped over. What are the best types of cattle to send. In order to obtain authentic information from data the result of experiment, sound in foundation, carefully conducted and recorded, the Dominion department of agriculture arranged early in 1922 for an experimental shipment of steers to England. This shipment went forward in May, 1923, and a second consignment was shipped in the fall of the same year. From these shipments much valuable information was received, published and distributed among the farmers of Canada. The comments were made up from the experimental farms and the cattle met with a very favorable receptions from British feeders and proved to be profitable purchases. One steer obtained the championship at the Norwich fat stock show last year. A shipment of chilled meat was made but the results were not encouraging and everything points to the advisability of developing the store trade to the limit. In co-operation with the department of the interior grazing lease conditions have been greatly improved from the ranchers' standpoint. In 1923 Canada sent across about 50,000 head of store cattle. This number was increased to 80,000 in 1924, and there is an increase of about 60 per cent. over the same period last year so far this season. The department takes every precaution to see that only absolutely healthy and vigorous animals are sent to the British market.

Trade Follows the Flag

British Empire Secures Markets For Its Work People

The work people who allow themselves to be deluded by the "Made" into a belief that the empire is the rather noxious plaything of the upper classes do not know where their own bread is. Trade follows the Flag," and it is the empire which, above all else, secures for them that means of selling their commodities upon which their work and their wages alike depend. England, without the empire, would very swiftly sink to the position of an inconsiderable island in the North Sea unable to support a population of more than six or eight millions at the outside.—London Referee.

This is not a bedtime story. Not that there is anything wrong with bedtime stories in general, but we are afraid they are not always absolutely true. And this story is true. Distressingly true. Distressingly so, at any rate, from Bruin's point of view.

It's another case, you see, of the fruits of filial disobedience. Young Bruin's family (and, for all we know, still lives) away up near the top of one of the mountains on the shores of Moraine Lake, in the Canadian Pacific Rockies. There was Mother Bruin and with her were her three little cubs, of whom Master Bruin, whom you see above, was the eldest. Pa Bruin had been away on a holiday for a few days and nobody was quite sure if he would ever turn up again. But, like the little optimists they were, they hoped for the best.

Now it happened one fine day that Master Bruin decided it was high time someone went out and tried to find father and induce him to return to the family circle. Ma Bruin, however, did not approve of the idea. "Young fella," said she, "you stay right where you are and let your pa take care of himself. I don't want you copying none of his bad habits." However, the wilful lad ignored his mother's kindly admonition and set out, ostensibly (ostensibly, mark you), to look for his Old Man.

Well, to cut a long story short, the young rascal really did not care a button (if, which we gravely doubt, bears have buttons), where his Old Man was, nor what he was doing. And what the real object of young Bruin's early departure from home was will be made all too painfully clear by the lower of the two above pictures. This picture was taken by a member of the Trail Riders of the Canadian Rockies during their recent Official Ride and Powwow, and he says that Bruin had made complete arrangements for a hasty elopement with the young lady he is seen with. The young lady, however, being under age, refused to elope without her parents' permission, and the end of the unfortunate affair was that Bruin was sent back to his sorrowing mother disillusioned, perhaps, and a little heartbroken, but, for all that, a better and nobler bear.

A few days later, Pa Bruin returned to the family fold, bringing with him a great supply of food for the winter, having heard from the visiting Trail Riders that the winter was to be an unusually severe one. And so peace and happiness returned to the Bruin household once more and, when Bruin made a clean breast of the whole wretched affair to his mother, that philosophical lady had nothing to say beyond murmuring, enigmatically, that "dogs, even Bruin boys, will always be boys." And that seems to be the only moral we can extract from this sad but perfectly true story.

Villagers Outwitted German Authorities

Saved Church Bells From Being Melted For Cannon

During the war the German authorities seized church bells all over the country and melted them down to make cannon. At a few cases, however, the church authorities, by hook or by crook, managed to hide their bells.

Catholic Bavaria felt very deeply the passing of bells from their religious work to the service of destruction. Orders were obeyed but a strange story is told of some villages in the higher Alps, where the bells were commandeered and were actually collected on a wagon for transport to Munich on the following day. When that day came, wagons and bells had disappeared. The strictest search was unavailing, so were threats of drastic penalty. Nothing was seen of the bells until peace had been declared. Then one Sunday morning, worshippers in the churches from which the bells had been taken found to their astonishment and delight that they had come back, as mysteriously as they disappeared.

Thinks Scientists Queer Lot

Southampton Policeman Has Evidence Of Their Absentmindedness

The police of Southampton have a little scientific problem of their own. A peep into the last property office reveals that 2,000 scientists, who were attending the annual meeting of the British Association, have lost dozens of umbrellas, scores of walking sticks, piles of handbags and heaps of notebooks, the latter mostly filled with complex names and notes beyond the comprehension of the police.

All of this adds further evidence to the fact that scientists are absentminded the world over. In the words of a Southampton policeman in charge of the lost property "scientists are a queer lot of folk."

Student Editor: "Have you interviewed the commencement speaker?"

Reporter: "Yes."

S. E.: "What did he say?"

Reporter: "Nothing."

S. E.: "I know that, but how many columns of it?"

Compressed cork, covered with 1½ inches of concrete, is being used in the building of houses in England.

Bruin Would A-Wooing Go

Says Men Best Athletes

University of London Professor Believes Women Are Inferior

The inferiority of woman to man in athletics was one of the numerous subjects discussed at a full meeting of the British Association at Southampton. In an interesting address as president of the physiological section, Prof. A. V. Hill, of University College, London, took as his theme the question of how a given effort could be maintained in violent exercise, and much depends on the intake of oxygen.

Prof. Hill, being an athlete himself, can claim to be an authority on the subject. He shared the Nobel Prize for medicine with a German professor in 1922.

Basing his remarks on records, the professor compared man's feats with woman's in various fields. Woman's achievements, he said, works out as follows: Running (for all but shortest races), 97 per cent. on maximum speed, 100 per cent. on energy expended. Swimming, 84 to 85 per cent. maximum speed, 72 per cent. on bodily power of man of similar weight. Jumping—high jump, 67 per cent.; long jump, 81.5 per cent. Man's figure for comparison taken at 100 and calculations based on masculine fatigue. Man's fastest running is attained for about 200 yards, and woman's for about 100 yards. Man could not exhaust himself completely in a 200-yard race, but a quarter-mile in the case of a first-class sprinter is almost enough to produce complete inability to any further effort.

Happiest and Loneliest

Two Distinctly Opposite Conditions As Seen In New York

The happiest appearing men in New York are Pullman porters after they doff uniforms and strike out from the big terminals for the socalled black belt of Harlem. They move in groups and sing and do jig steps along the street. Whether the trip has been prolific in tips or not means nothing to them. They are off to join their own folks in Harlem street in Upper Lenox Avenue, and it is as lively in many ways as Broadway. They have their white way of dazzling signs, movie palaces, a theatre where the most exciting comedy comique in town is appearing, pool halls, glittering drug stores, hairdressing and manicure parlors, and all the other resplendent fanfaronade of Broadway.

The loneliest would in New York it strikes me are the venerable scrubwomen in the midtown hotels. The days begin for them at dusk when they take their creaking rheumatic bodies out to the rooftops. And there they sit and stare in silence for hours. It is their only relaxation.—New York Correspondent.

How Old Are Trees

Some Spruce in Eastern Canada From 250 to 300 Years

Many Canadians hold the mistaken idea that when forests burn, a new crop of timber grows in about 20 years. Most of the timber trees in Eastern Canada are from 70 to 150 years old, with occasional old spruce running up to 300 years old.

In forests of this kind it is no uncommon thing to find a spruce of less than three inches in diameter on the stump and 12 to 15 feet high, which is already 40 to 100 years old. (This is the result of suppression under the deep shade of other trees.)

The big old white pines which are sometimes found among the spruce and balsam may be anything up to 200 years old. The farther north you go the slower is the rate of growth; one large paper company situated on a northern river, is basing its calculations for supply on a hundred-year period of growth—and this for pulpwood, not saw logs.

Ceding Gibraltar

A Hardy Annual Topic Like the Sea Serpent Story

The cession to Spain of Gibraltar is a hardy "silly season" topic like giant goosebernies and sea serpents. It is not the only portion of the British empire that is periodically disposed of, for the cession of the British West Indies to the United States is likewise mooted from time to time. The cases are not identical, however. The West Indies would be better off commercially under the United States, but prefer to remain British. The natives of Gibraltar (other than the Hasbary apes) would not benefit by the exchange, and the sentiment which is supposed to favor the cession of the fortress is Spanish pride.—London Morning Post.

Seaweed As Food

When the tide recedes along the coasts of various parts of Japan the beaches are dotted with people gathering seaweed and carrying it to drying racks of bamboo. After drying it is baled and shipped. The seaweed usually is boiled and eaten with rice.

The High Cost Of Slums

By Marjorie Bradford, B.Sc., Social Service Council of Canada

Although Canadian towns and cities have made an increasing interest in town planning, activities in this important field are not yet commensurate with the economic and social importance of the subject or the vigorous extension of the movement in other countries. In 1916 the Federal Government established an advisory town planning office under the commission of conservation. Owing largely to the educational work carried on by that office, town planning legislation has been passed in seven of the provinces. But the majority of these have not put their acts into operation or appointed a qualified executive, and consequently there are few cities in Canada that have adopted comprehensive plans for the future development of their areas.

Meanwhile much money is being wasted in piece-meal and obsolete development of a temporary character; jumble building, destructive of stability in property values, is going on everywhere, tremendous waste, especially among low paid wage earners, are refusing to build because there is no security against a constantly changing environment that muddles up home dwellings, commerce and manufacture. With such conditions obtaining the city loses money through a lowering of the assessment value of the property, the home owner faces a serious loss in the decrease of the value of his home and loan companies become more and more hesitating to lend money on real estate because of the general insecurity of property values.

Largely on account of such conditions, Montreal can claim only twelve per cent. of its citizens as home owners and dwelling up of families is the order of the day in that city.

Over nine per cent of Canadian dwellings, that is almost one in every ten, are either of one or two rooms. Most of these cramped dwellings are to be found in the slums of our cities. The cost of jumble building on the moral side is the destruction of the life and happiness of the people and the creation of social disorder, disease and discontent. When slums are allowed to develop they create the gravest and most expensive problem of the city. In an unzoned city the houses of the well-to-do are usually protected from jumble building by private restrictions, but even here restrictions become less and less operative and effective with the changes in property ownership. The dwellings of the poor are robbed of their light and air and pleasant surroundings and degenerate into slums, which become the disease spot of the city. Hospitals and prisons have to be built and maintained at the public cost to deal with the ill-effects of bad city buildings. Garden cities in Europe have demonstrated that workingmen's children who live in houses (twelve to the acre instead of in slums with forty houses to the acre, and ten to twelve pounds heavier than their brothers and sisters of the slums.

Difficult To Pronounce

Chicago Man Has Twenty-nine Letters In Surname

Chicago has a man with 29 letters in his name, who pays no income tax, the records revealed. It was suggested that the burden of supporting his name was an excellent reason for claiming exemption. Omitting his given names, of which there are two, here is his surname: Econonapoulosathergewzerzlew. Try that on your radio and then call it a day. His Angelized front name is William and three clerks labored over trying to copy the affidavit he furnished the government, explaining why he was not taxable.

Sure Of Her Position

A prominent comedian of the movie world says the British stand "bidding" better than other nations do, and he thinks it is because they are an outdoor sport loving people. Fresh air and exercise certainly do take the cobwebs out of the brain and diminish the bump of childish self-importance. But isn't there something else in the circumstance that the British are perfectly sure of their position among the nations of mankind and do not feel that they need to worry about their dignity?—Detroit Free Press.

Valuable Jewels of Maharajah

The jewels of the Maharajah of Patiala, now in London, are the accumulations of centuries, and are incredibly valuable. They are kept in huge trunks, some twenty in number, that fit one within the other. Twenty hereditary retainers, with 20 different keys, one for each trunk, attend whenever these state treasures are unlocked. When travelling his highness restricts himself to a few personal jewels valued at £100,000.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. J. S. Halstead, oldest Free Mason in the United States, and possibly in the world, died recently at the age of 107.

Officials of a safety association have computed the annual "traffic loss" of the United States. It amounts to two billion dollars annually, or $20 for every citizen.

The importation of Welsh semi-anthracite coal to supplement supplies of Pennsylvania anthracite during the present strike is being considered in New York.

Rt. Hon. Sir J. Jordan, former British minister in Peking and member of the League of Nations advisory committee, died suddenly at a meeting of the China Association in London.

Robert A. Loar, a West Virginia attorney, having made a bet during the last presidential campaign that Davis would beat Coolidge, has paid up by walking 410 miles barefoot.

A stamp bearing the likeness of President Wilson will be issued by the United States post office department by the first of December, if the plans of the friends and admirers of the war president succeed.

Manufacture of liquor containing 60 per cent. of alcohol and vodka of 40 per cent. will be permitted in Soviet Russia from October 1, under a decision reached by the central executive committee.

It is announced that the French Government has accepted the invitation of the Toronto Horse Show officials to be represented at the tournaments in the Ontario city next November.

The United States post office department plans to open eight new air mail routes this fall. Bids for the contracts for the new routes, which are in the south and west, have been opened.

The London Evening News quotes Congressman Fred Britten, of Illinois, on his way home after a trip to Russia, as saying: "I talked to Tchitcherin and others, and concluded that they are a lot of murderers and thieves."

Pending realization of the League of Nations' hopes of general limitation of armaments, efforts will be made immediately for a gradual reduction of Holland's military forces while maintaining a defence compatible with the present international situation.

Britain has entered the stage of "capitalist disintegration" and is "headed for revolution," Leon Trotzky declares in a book entitled "Whither England," an American edition of which has been published in New York.

London To Australia In Week

Two New British Airships Can Carry 140 Passengers

Two airships are now in the course of construction in England which it is claimed will be able to fly to Australia in a week. The two new British airships which are to inaugurate the inter-empire air services in 1927 are of 5,000,000 cubic feet capacity, or nearly twice as large as the present largest airship in the world. Each of the new ships can carry 20 crew and the R100, Commander Burney's ship—the other, R101, is being built by the air ministry—will have a capacity for 140 passengers. Though the speed of these ships is around 75 miles an hour, the ships that will follow these pioneers will, according to Burney's plans, travel at 100 miles an hour, and bring the continent of Australia, 10,000 miles away from Europe and Asia, within four days' time distance from the heart of the empire.

Wonders Of Radio

Photo Transmitted By Radio While Lecture Is Broadcast

What radio-television may finally carry to millions of homes was illustrated in New York at the fourth annual national radio exposition at Grand Central Palace, when a photo of David Sarnoff, vice-president of the Radio Corporation of America, was transmitted by radio at the same time his address was broadcast.

Sarnoff predicted the time when the American farmer would "sit in" on an operatic performance broadcast from Covent Garden in London, and when a speaker would be able to send his voice into every home equipped with radio.

Many Leaves On Elm Tree

A certain botanist who has given much thought to the matter estimates that a good-sized foliage tree such as an elm, may produce a crop of no fewer than seven million leaves. The combined surface of all these leaves amounts to no less than 200,000 square feet.

A Daring Experiment

Electrical Wizard Believes That Science May Rival Nature

Across the gap between the electrodes of a giant electric machine leaped a mighty arc of blue-white flame. A terrific crackling roar smote the quiet of a Paris laboratory. Then Prof. Jean Perrin, white-haired, white - bearded, benevolent - faced, opened a switch with a long-fingered white hand. The dazzling glare was snuffed out. The crackling ceased. In the sudden quiet even his low-pitched, pleasant voice sounded loud.

"It is but the beginning," he said. "Soon I shall have available a means of producing 10,000,000 volts of direct-current electricity. Then, perhaps, I shall be able to reproduce, on a small scale, the conditions that cause the radiation of light and heat from the sun and the still more gigantic stars of the universe!"

Such is the report given by Frederic M. Delano in the October Popular Science Monthly, of a remarkable experiment recently completed by Professor Perrin, head of the laboratory of physical research of the famous University of Paris, an experiment that leads this noted French scientist to believe that eventually he will be able to create, in effect, another sun.

"With 10,000,000 volts of direct-current electricity," said Professor Perrin, "I believe I can break up the atomic structure of matter—disintegrate individual atoms; perhaps even drive the nucleus of one atom into another atom and thus create a much denser atom. If I am able to do that the secret of the sun's radiation will have been solved.

"I believe," he explained, "that the sun is formed by the constant changing of the extremely light atoms of hydrogen into atoms of greater weight, such as atoms of oxygen, nitrogen and the other heavier elements. According to my theory—and many other scientists agree with that theory—everything in the universe—the sun, the stars, the planets, and everything on them—once consisted of atoms of hydrogen, and these have changed gradually into heavier atoms that make up our atmosphere, our soil, our rocks, our own bodies.

"In changing into any other element, I believe that hydrogen changes first into helium, which was found in the sun before it was found on earth. In doing so, a portion of its atomic weight is lost and given off as energy. This released energy comes to us from the sun in the form of light and heat, and makes life possible on earth.

"By hurling against the atomic structure 10,000,000 volts of electricity, I may be able to produce this change, of light atoms into heavier atoms, and thus, in effect, create another sun."

Some of the vast energy released by a great sun-producing plant, Professor Perrin predicts, could be captured and transmitted in the form of electricity to run factories and trains, or to provide light and heat for great communities in place of coal and oil.

Canada Is Well Represented

Has Members On Various Committees Of League of Nations

The Dominions and India are well represented on the various committees of the Assembly of the League of Nations, at Geneva.

The following Canadians are on committees:

Hon. Philippe Roy, commissioner-general in Paris, committee on technical questions and the financial and economic committee; Senator Hewitt Bostock, Kamloops, B.C., armament committee; and W. A. Riddell, Canada's permanent representative at the league, in charge of the Canadian bureau, committee on social questions and committee on political questions.

British Soldier Had To Discard Uniform

Obliged To Wear Civilian Clothes In Irish Free State

A British soldier of Innisfallen, who entered Free State territory at Hundoran, Donegal, in khaki uniform, with some of his relatives, was arrested by Civic Guards, who said he had thereby committed an offence, and would be detained. The offender, who said he was unaware of the offence, was then given a civilian cap and coat and was set free to enjoy his stay in Hundoran. When his day's holiday ended he reported to the Civic Guards in barracks and returned the civilian clothes.

A lunatic, acting as engineer at Donegal (Ireland) Mental Hospital, is regarded by the chairman in charge as an absolute genius. He has saved the committee over £1,000 by his capability.

In the long buried city of Ur of the Chaldees a piece of sculpture has been dug up, showing a picture of workmen carrying mortar up ladders.

A Simple Design For Girls

Girls' dresses adhere to simple lines and often are quite restrained in their ornamentation. The belts are the main trimming feature of the dress pictured here, which is cut in one piece, with a little extra fullness over the hips at the low waist-line. The sleeves may be made short or long and gathered into a band at the wrist. The dress has an opening at the centre front, and the neck is finished with a narrow collar. Sizes 6, 8, 10, 12 and 14 years. Size 8 years requires 3½ yards of 32-inch, or 2¾ yards of 36-inch material. Price 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her tastes fulfilled in our patterns. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

Used Seventy-Year-Old Christening Robe

Baby Girl Christened In Robe Worn By Grandfather At Similar Ceremony

Seventy years ago, on board ship in mid-Atlantic, making the then slow and difficult voyage from Scotland to Canada, a little Scotch baby was christened. This was Master Alexander Fleming, who, after coming to Canada as the parents as a tiny lad, became an honored citizen of Carnation, Ont. Recently Alexander Fleming's baby grand-daughter, Marion June Fleming, daughter of Mr. and Mrs. Edgar Fleming, of Carnation, was christened in London, Ont. Col. the Rev. Dr. William Hincks administered the rite of baptism following the marriage of the baby's aunt. And the baby girl, who went through both these ceremonies with much dignity, was dressed for the big occasion in the same little lace-ruffled robe worn by her grandfather at his more adventurous baptism, 70 years ago.

Refuse To Comply With Request

Radio Negotiations With French Government Prove Unsuccessful

Negotiations which the British Government is conducting with the French Government on behalf of Canadian radio operators with regard to cessation of the use of 450 and 300 metres wave by their ships and stations on the east coast of Canada have been unsuccessful, the French Government being unable to see its way clear to comply with the British Government's request.

The German Government, it was learned, has agreed to comply with the request of Canadian radio operators, and has issued instructions accordingly to ships flying the German flag.

Plan to Salvage Treasure

Operations for the recovery of all treasure lost at sea since the time of the Spanish Armada are planned by salvage experts.

The total value of sunken treasure is estimated at one billion pounds.

First operations will be off the Irish coast.

Wembley Exposition Faces Big Deficit

Estimate Puts Loss At About Three Million Pounds

The British empire exposition at Wembley will prove as great a financial failure this year as in 1924, it is feared. One estimate puts the loss to the big British firms guaranteeing the exhibition at £3,000,000.

This pessimistic forecast is based on the rate of attendance to date. It is estimated that unless the attendance totals rise only 8,500,000 persons will have gone to Wembley this year by the time the great fair closes its gates at the end of October. Last year 17,000,000 paid admission, which was half the number needed to make Wembley a financial success.

"The biggest business proposition ever put up by this country is also the biggest failure," says one London newspaper today, attributing the failure to the fact that "Wembley all along has lacked a showman—an inspired autocrat who with the marvelous material at hand could have made it the most successful and stimulating exhibition the world has known. Today Wembley is a tragedy of inexpert management."

Manitoba Wheat Pool Do Well

Handled Over Eight Million Bushels At Slight Cost

The Manitoba Wheat Pool alone handled nearly eight and a half million bushels of wheat last year at an administrative cost of slightly over three-fifths of a cent per bushel. Interest, insurance and elevator charges absorbed a little less than half a cent, the total cost thus being a trifle over a cent a bushel.

At the annual meeting of the pool held in Winnipeg, three prizes of $75 each are voted to be given next year for the best essays on co-operation—competition to be limited to teachers and college students in rural high schools in the province.

A resolution was unanimously passed, to become effective at the next meeting of the pool, declaring that no member of the legislature or of parliament, or director of the United Farmers of Manitoba or the Farmers' Union of Canada shall be eligible to serve as director of the wheat pool.

Real News

Finding of a Rust-Retisting Variety of Wheat

Great events often are simply chronicled. From Aberdeen comes the brief announcement that the claim of R. S. McFadden, dairy and wheat grower, to have developed by cross breeding a variety of wheat that resists all efforts to inflict it with rust, has been tested by department of agriculture scientists and found to be true.

Finding of a rust-resisting variety of wheat means literally billions of dollars to the agriculture of the world just as discovery of the durum drought-resisting wheat brought to millions of dollars. Such triumphs are of far more importance and deserving of more public attention than news of the declarations of wars or the signing of peace treaties.—Fort Worth Star Telegram.

Baldwin and His Pipe

Breaks Tension at Critical Period in Negotiations With Miners

The pipe of peace was once more in evidence at a critical period of the recent negotiations between coal miners, owners and the government. When the two sides reached a point where a deadlock seemed inevitable, and the atmosphere was strained and formal, Premier Stanley Baldwin fumbled in his pocket and produced his pipe. This he began slowly to fill, remarking: "Let's smoke, shall we?"

The suggestion was adopted by both miners and owners, and the formality of the strained atmosphere gradually disappeared. Within an hour the basis of a provisional agreement had been reached.

Broadcast Carnival Sounds of Fair

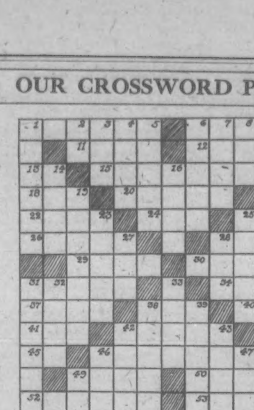

Broadcasting the carnival sounds of a big state fair will be attempted for the first time. Raucous cries of the hot dog vendors, the tooting of merry-go-rounds, the squealing of pigs, crowing of cocks, mooing of cows, the patter of racing hoofs on the track, the roar of speeding automobiles and the bias of the hurdy-gurdy shows will be put into the microphone of a St. Paul station from the Minnesota state fair grounds.

When Locusts Stop Flying

A flight of locusts will rise to a great height and cover forty or fifty miles in a day. But once the locust swarm comes to the ground, there it remains, devouring every green thing and never again using its wings.

If wives were as nice to their husbands as female clerks are to their male customers, but few matrimonial failures would be recorded.

OUR CROSSWORD PUZZLE

Horizontal

1—Colored crayon.
6—Talks.
11—Greasy.
12—Injured.
13—Opposition.
15—Separating.
17—Physician (abbr.).
18—Male child.
20—Lowest tides.
21—Social function.
22—Smell.
25—Nickname for a relative.
26—Ate no time.
28—Wounds in a coarse manner.
29—Sufficient (poetic).
30—Low male voice.
31—Overgrown with decaying organic matter.
34—Hag.
37—Higher branches of learning.
38—Small bed.
40—Slither.
41—Settle with.
42—Marks or stains.
44—The jackdaw.
45—Short thoroughfare (abbr.).
46—Ripping.
48—Prefix meaning two.
49—Overcomes with reverential fear.
50—Free from water by dipping.
53—Devils.
53—Inciting.

Vertical

1—Venom.
2—Thus.
3—Point.
4—Ardor inspired by enthusiasm.
5—Musical instruments.
6—Vessels.
7—Play on words (pl.).
8—Unit of energy.
9—Near.
10—Wanders.
14—Protuberance.
16—Appendage.
19—Apportionment.
19—Something new.
21—Put faith in.
23—Tears asunder.

32—Spoken.
35—Acrid.
35—Crustacean.
36—Chopping.
38—Grade.
39—Clan.
42—Witnessed.
43—Obstruction.
46—Twice owe.
47—Kind of carriage.
49—Part of "to be."
51—Chinese weight or measure.

Example To World

Election of Senator Dandurand of Canada to Presidency of League of Nations

Canada constituted an "example to the world of how to handle successfully the problem of the treatment of minority populations," declared Paul Painleve, premier of France, as the retiring chairman of the League of Nations Assembly, speaking in the assembly at Geneva on the election of Hon. Senator Raoul Dandurand, of Canada to the presidency. The election was the feature of the session.

M. Painleve paid a tribute to Senator Dandurand as a statesman of high capacity and deep knowledge of juridical questions, and referred to Canada as a common ground of British and French wives. In Canada, M. Painleve said, French civilization lives peacefully and in brotherly union with British.

He said that the choice of the assembly was particularly felicitous, as Canada was the common ground with the British and French civilization.

For British Show

Shipment of Manitoba Butter Goes To England

Ten boxes of Manitoba butter have been shipped to England to compete in the 67th annual dairy show of the British Dairy Farmers' Association at the Royal Agricultural Hall, Islington, London.

The classes in which the shipment is entered are the 56-lb. box of salted and 56-lb. box of unsalted butter. One entry in each class has been sent by the Crescent Creamery, Winnipeg; Gallagher, Holman Company, Manitoba Co-operative Dairies, Shoal Lake Creamery and the City Dairy.

The dates of the show are: Oct. 20 to 23, inclusive. Letters recently received from W. A. Wilson, dairy products representative in England, are such as to give every hope of a good showing by Canadian exhibits, as the commercial article is showing decided improvement of late.

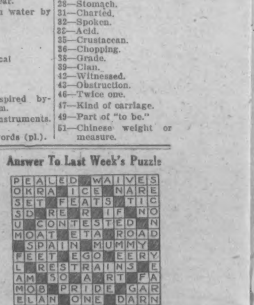

To Honor Canada's Womanhood

Site For National Woman's Memorial Hall Is Granted

The site for a national woman's memorial hall has been granted by the Dominion Government, it was announced at an executive meeting of the Ottawa Woman's Club. The action of the government is the result of a request made by a delegation of women who waited on the privy council last January, asking for a site for a memorial hall, to be used by all national organizations of women throughout the Dominion, irrespective of race or creed. The location of the site has not been disclosed, but it is understood that it will be a place of considerable prominence in the capital.

Five gallons of gasoline has an explosive power equal to 418 pounds of dynamite.

Answer To Last Week's Puzzle

C.N.R. Tourist Traffic Sets New Record

Passenger Traffic This Year Has Surpassed All Previous Records

Reports presented at a recent meeting of passenger traffic officials of the western region, Canadian National Railways, held at Jasper Park Lodge, showed that passenger travel this year on both rail and steamship services of the system has surpassed all previous records. Despite the increased accommodation offered this season at Jasper Park Lodge, the quarters have been filled to capacity throughout the summer. This summer the Canadian National entered the Alaska trade with great success, while the development of the Yangtze Valley, taking in Vancouver, Jasper Park and Prince Rupert, has brought more tourists into the Northern Canadian Rockies than ever before. R. Creelman, passenger traffic manager of the region, announced that greater efforts than ever will be made to place Canada before intending tourists and to develop also traffic east and west within the Dominion.

May Prove Successful

Claimed Discovery of Cure For One Form of Cancer

An article in the Lancet, leading British medical journal, by Dr. Thomas L. Mundsen, of the Lister Institute of Preventive Medicine, reveals the alleged discovery of a cure of the form of cancer known as sarcoma.

The efficacy of the cure is qualified only in that it has thus far only been applied to rats, in which the disease has been transplanted.

Of fifty rats treated, according to Dr. Mundsen, 82 per cent. have been cured.

Ship Lumber to Japan

The lumber export trade from the Pacific coast with Japan has been steadily increasing since the war, and official export figures covering logs, timber and lumber of all kinds show the following results for the past three years: 1923, 568,438,000 feet; 1923, 742,821,000 feet; and 1924, 839,751,000 feet.

G. Holt Thomas, Buckinghamshire, claims the world's time record in building a house. Thomas, with four men, put up a wooden house of four rooms in ten hours and 45 minutes.

BAREE, SON OF KAZAN

by James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS

Hidden beneath a huge rock, Baree, the untamed wolf-dog, was terrified to see Pierrot, the half-breed trapper, shoot and kill Wayakoo, the black bear. This was slaughter, but for the two human creatures it was the business of life. Nepesee went after Baree and tried to entice him from his hiding place. For the first time the dog had a name. It was the Indian princess who called him Baree.

CHAPTER VIII.—Continued.

In that moment Nepesee felt the pressure of the rock on her shoulder, and into the eyes that had been glowing softly at Baree there shot a sudden wild look of horror. And then there came from her lips a cry that was not like any other sound Baree had ever heard in the wilderness—wild, piercing, filled with agonized fear. Pierrot did not fear that first cry. But he heard the second and the third —and then scream after scream as the Willow's tender body was slowly crushed under the settling mass. He ran toward it with the speed of the wind. The cries were weaker—dying away. He saw Baree as he came out from under the rock and ran into the stream, and in the same instant he saw a part of the Willow's dress and her moccasined feet. The rest of her was hidden under the death trap. Like a madman Pierrot began digging. When a few moments later he drew Nepesee out from under the boulder she was white and deathly still. Her eyes were closed. His hand could not feel that she was living, and a great moan of anguish rose out of his soul. But he knew how to fight for a life. He tore open her dress and found that she was not crushed as he had feared. Then he ran for water. When he returned the Willow's eyes were open and she was gasping for breath.

"The blessed saints be praised!" sobbed Pierrot, falling on his knees at her side. "Nepesee, ma Nepesee!"

CHAPTER IX.

Impelled by the wild alarm of the Willow's terrible cries and the sight of Pierrot dashing madly toward him from the dead body of Wakayoo, Baree did not stop running until it seemed as though his lungs could not draw another breath. When he stopped, he was well out of the canyon and headed for the beaver pond.

PAINS IN LEFT SIDE AND BACK

Other Troubles Women Often Have Relieved by Lydia E. Pinkham's Vegetable Compound

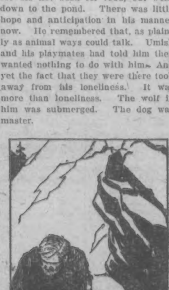

Lachine, Quebec.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my left side and back, and with weakness and other troubles women so often have. I was this way about six months. I saw the Vegetable Compound advertised in the 'Montreal Standard' and I have taken four bottles of it. I was a very sick woman and I feel so much better I would not be without it. I also use Lydia E. Pinkham's Sanative Wash. I recommend the medicines to my friends and I am willing for you to use my letter as a testimonial."—Mrs. M. W. Rose, 620 Notre Dame Street, Lachine, Quebec.

Doctor Said an Operation

Provost, Alberta.—"Perhaps you will remember sending me one of your books a year ago. I was in a bad condition and would suffer awful pains at times and could not do anything. The doctor said I could not have children unless I went under an operation. I read testimonials of Lydia E. Pinkham's Vegetable Compound in the papers and a friend recommended me to take it. After taking three bottles I became much better and now have a bonny baby girl four months old. I do my housework and help a little with the chores. I recommend the Vegetable Compound to my friends and am willing for you to use this testimonial letter."—Mrs. A. A. Adams, Box 64, Provost, Alberta.

Exactly wherein lay Baree's fears it would be difficult to say—but surely it was not because of Nepesee. The Willow had chased him hard. She had flung herself upon him. He had felt the clutch of her hands and the smother of her soft hair, and yet of her he was not afraid. If he stopped now and then in his flight and looked back, it was to see if Nepesee was following. He would not have run hard from her—alone. Her eyes and voice and hands had not something stirring in him; he was filled with a greater yearning and a greater loneliness now—and that night he dreamed troubled dreams.

Baree was glad when the dawn came. He did not seek for food, but went down to the pond. There was little hope and anticipation in his manner now. He remembered that, as plainly as animal ways could talk. Umisk and his playmates had told him they wanted nothing to do with him. And yet the fact that they were there took away from his loneliness. It was more than loneliness. The wolf in him was submerged. The dog was master.

"The blessed saints be praised!" sobbed Pierrot, falling on his knees at her side."

In one of the larger canals Baree surprised a big beaver towing a four-foot cutting of birch as thick through as a man's leg—half a dozen breakfasts and dinners and suppers in that one cargo. The four or five inner barks of the birch on which might be called the bread and butter and potatoes of the beaver menu, while the more highly prized barks of the willow and young alder take the place of meat and side.

Baree smelled curiously of the birch cutting after the old beaver had abandoned it in flight, and then went on. He did not try to hide himself now, and at least half a dozen beavers had a good look at him before he came to the point where the pond narrowed down to the width of the stream, almost half-a-mile from the dam. Then he wandered back. All that morning he hovered about the pond, showed himself openly.

In their big mud-and-stick strongholds the beavers held a council of war. They were distinctly puzzled.

It may be that the beavers discussed the matter fully among themselves. It is possible that Umisk and his playmates told their parents of their adventures, and of how Baree made no move to harm them when he could quite easily have caught them. It is also more than likely that the old beavers who had fled from Baree that morning gave an account of their adventures, again emphasizing the fact that the stranger, while frightening them, had shown no disposition to attack them. All this is quite possible, for if beavers can make a large part of a continent's history, and can perform engineering feats that nothing less than dynamite can destroy, it is only reasonable to suppose that they have some way of making one another understand.

However this may be, courageous old Beaver-tooth took it upon himself to end the suspense.

It was early in the afternoon that for the third or fourth time Baree walked out on the dam. This dam was fully two hundred feet in length, but at no point did the water run over it, the overflow finding its way through narrow sluices. A week or two ago Baree could have crossed to the opposite side of the pond on this dam, but now—at the far end—Beaver-tooth and his engineers were adding a new section of dam, and in order to accomplish their work more easily, they had flooded fully fifty yards of the low ground on which they were working. The main dam held a fascination for Baree. It was strong with the smell of beaver. The top of it was high and dry, and there were dozens of smooth-ly worn little hollows in which the beavers had taken their sun-baths. In one of these hollows Baree stretched himself out, with his eyes on the pond. Not a ripple disturbed its velvety smoothness. Not a sound broke the drowsy stillness of the afternoon. The beavers might have been dead or asleep, for all the stir they made. And yet they knew that Baree was on the dam. Where he lay, the sun fell in a warm flood, and it was so comfortable that after a time he had difficulty in keeping his eyes open to watch the pond. Then he fell asleep.

Just how Beaver-tooth sensed this fact is a mystery. Five minutes later he came up quietly, without a splash or a sound, within fifty yards of Baree. For a few moments he scarcely moved in the water. Then he swam very slowly parallel with the dam across the pond. At the other side he drew himself ashore, and for another minute sat as motionless as a stone, with his eyes on that part of the dam where Baree was lying.

A few yards away Baree was almost hidden in his hollow, only the top of his shiny black body appearing to Beaver-tooth's scrutiny. To get a better look, the old beaver spread his fat tail out beyond him and rose to a sitting posture on his hind-quarters, and two front paws held squirrel-like over his breast. In this pose he was fully three feet tall. He probably weighed forty pounds, and in some ways he resembled one of those fat, good-natured, silly-looking dogs that go largely to stomach. But his brain was working with amazing celerity. Suddenly he gave the hard mud of the dam a single slap with his tail—and Baree was up. Instantly he saw Beaver-tooth, and stared. Beaver-tooth stared. For a full half-minute neither moved the thousandth part of an inch. Then Baree stood up and yawned his left ear.

That was enough. Dropping to his fore-feet, Beaver-tooth waddled leisurely to the edge of the dam and dived over. He was neither cautious nor in very great haste now. He made a great commotion in the water and swam boldly back and forth under Baree. When he had done this several times, he cut straight up the pond to the largest of the three houses and disappeared. Five minutes after Beaver-tooth's exploit, word was passing quickly among the colony. The stranger—Baree—was not a lynx. He was not a fox. He was not a wolf. Moreover, he was very young—and harmless.

(To be continued)

Dentist Worked At High Altitude

Extracted a Molar During Flight in an Aeroplane

Testing a local anaesthetic, a merry dentist and a daring patient soared 2,500 feet in an aeroplane above Chicago to perform the ceremony of extracting an embedded wisdom tooth.

The dentist held that best results could not be achieved on the ground, due to humidity of Chicago's atmosphere. The patient, a man of about 40 years, who modestly refrained from giving his name, was willing to try anything once, although he had never tried an aeroplane ride.

J. Nelson Kelly, aviator, tuned up his Curtiss plane and climbed to a 2,500 foot ceiling above Ashburn Field. The dentist applied the drug, took a firm grip on his forceps, and vaulted.

All came down smiling, with the dentist admiring a vicious looking tooth, once deep rooted.

Something To Remember

To such reckless persons as are planning to race the train to the crossing, the words of a Great Northern railroad official might prove of interest. "A train," says he, "is approximately 1,650 times as heavy as the average automobile."

Birmingham, England, is one of the greatest industrial cities because each week there is made there 14,000,000 pens, ten tons of pipe, 6,000 metal beds, 7,000 tons of rifles and other articles.

No man ever becomes too shiftless to give advice.

Believe Bird Flew Across Atlantic

One Killed In Newfoundland Was Tagged In England

The Canadian national parks branch which keeps a record of all wild bird banding operations of interest to Canada, has had brought to its attention an account of a bird locally called a "tickiace," which was killed on 12th August, 1924, by Mr. L. Curtis, of Horse Island, in the district of St. Barbe, Newfoundland. On the bird was found a thin silver band inscribed with the words: "Inform Witherby, High Holborn, London."

On writing to Messrs. H. F. and G. Witherby, 326 High Holborn, London, W.C.1, England, it was learned that this ring, No. 67,423, was put on a young kittiwake (Rissa tridactyla), on 28th June, 1923, on the Farne Islands, Northumberland, England, by one of Mr. Witherby's correspondents. The foot of the bird was examined and was pronounced to be that of a kittiwake, which agrees with Mr. Witherby's records.

The record is extremely interesting, more especially as this bird is the first under Mr. Witherby's ringing scheme —which has been in operation for 16 years—reported from this side of the Atlantic.

Did it get a lift on a passing steamer, one wonders?

Urges General Use Of Canadian Ports

Saint John Man Has Started Out On New Mission

A. M. Belding, of the editorial staff of The Telegraph-Journal, Saint John, N.B., started on an active canvass of Canadian importers and exporters in favor of the more general use of Canadian ports by Canadians. Early in the year, Mr. Belding made a trip from coast to coast, addressing boards of trade, chambers of commerce, Canadian clubs, and various other organizations in search of information which would be serviceable in bringing about a better understanding among Canadians, and the more general use of Canadian ports by Canadian shippers and importers.

Mr. Belding's mission on this occasion will be somewhat different, inasmuch as he proposes to make a door-to-door canvass of the manufacturers, wholesalers, jobbers, department stores, etc., in an effort to bring about the greatest possible use of Canadian railways and their employees, and Canadian port workers, in the carriage of freight billed from Canada and routed into this country from British and foreign sources.

Rub it in for Lame Back.—A brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Spanlard Introduced Grape Fruit

Ponco de Leon, the Spaniard who discovered Florida while in search of the fountain of youth, is credited with having brought the first grape fruit to this country. For 300 years the fruit was not cultivated.

Palestine has made great progress within the last few years in the cultivation of tobacco.

Have You Pimples Or A Clear Smooth Skin?

If you wish a skin clear of pimples, blackheads and other annoying eruptions begin today the regular use of Cuticura Soap, assisted by Cuticura Ointment. No other method is so agreeable, so often effective and so economical.

Cuticura Soap and Ointment are sold throughout the world. A liberal sample of each, with 32-p. Skin Book, will be mailed free on request. Address: "Cuticura, Dept. B, Malden, Mass." Cuticura Shaving Stick 25c.

Nurses Use English At World Meeting

Chosen As Official Language at Congress in Helsingfors, Finland

Although nearly every country in the world was represented at the fifth congress of the International Council of Nurses, held in Helsingfors, Finland, in July, English was chosen as the official language. Miss Beatrice Ellis, superintendent of nurses at the Toronto Western Hospital, and the assistant superintendent, Miss Ida McAfee, who attended the congress, referred to the remarkable fluency of the majority of the delegates in English as well as other languages. China's representative was able to present her reports and suggestions in excellent English, but the charming Japanese official delegate had to use an interpreter.

Finnish nurses during the year preceding the congress gave up many of their leisure hours to the study of English in order that they might be properly equipped for an international convention. Miss Ellis praised highly the committee responsible for all the arrangement of the congress week, and declared that she was much impressed with the wonderful organization of the Finnish nurses.

Canada's delegates occupied an important place on the programme, and the exhibits of books, slides and equipment from the Dominion, in the opinion of Miss Ellis, were second to none in matters of nurses' training schools, hospital administration and public health work also, Canada was well to the forefront. Miss Jean Browne, president of the Canadian Nurses' Association, who had the honor of welcoming France into the council, referred to the fact that nursing was first introduced into Canada by French women.

Five new countries were accepted into the council, and China was decided upon as the meeting place in 1929. Of the 1,049 delegates registered, 62 were from Canada.

Created Job For Himself

Man Earns Comfortable Living Watching Parked Automobiles

A man after well-nigh losing heart in vain efforts to find work at his trade, "made" a new job for himself by way of the motor car. Because they interested him, he got into the way of loitering about a quiet side street where the police allowed motor cars to be parked for indefinite periods. From instinctively "shooting-off" mediocre youngsters he passed by degrees to "standing by" cars, at the request of their owners in return for a small fee. He soon became the recognized custodian of the "park," was issued with a police armlet, and now renders a surprising variety of little services to his patrons, who are glad to know that there is a reliable man always on guard. His earnings fluctuate considerably, of course, but occasionally he has a real stroke of luck, as when a lady driver rewarded him with a 5s tip for adjusting a loose cable that had put her headlamps out of action.

Minard's Liniment used by physicians

Something To Consider

Good Service is Right That Public Will Demand

The interest of the consuming public is the last thing which either side considers; but the day will surely come when it will have to be one of the first, for, after all, the public holds the whip hand if it cares to assert itself. It is all a question of service. The continual disturbances in the coal industry are having the effect of greatly changing preconceived ideas of final economics. Strikes and lockouts are weapons for killing the goose which lays the golden eggs. Sooner or later employers and employees will be brought to understand this.—Hamilton Spectator.

Fewer Homesteads Available

Within recent years the areas in the western provinces available for homesteads have become more and more restricted. On January 1, 1925, the Federal Government estimated that of the area surveyed in Manitoba, Saskatchewan and Alberta, 65,000,000 acres were devoted to homesteads.

All insects have six legs, and their bodies are divided into three parts. Spiders have eight legs and are not insects, but belong to the order Arachnida.

Worms sap up the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Josephine (reading conclusion of long letter): "Then I will come home and marry the sweetest little girl on earth."

Juliet: "What a mean trick! After being engaged to you."

Minard's Liniment for Distemper

WRIGLEY'S
AFTER EVERY MEAL
THE FLAVOR LASTS

Probably one reason for the popularity of WRIGLEY'S is that it lasts so long and returns such great dividends for so small an outlay. It keeps teeth clean, breath sweet, appetite keen, digestion good.
Fresh and full-flavored always in its wax-wrapped package.

New Channel Plane Carries Restaurant

Passengers From London to Paris Have Hot Meals

The latest addition to the air service between London and Paris is a new giant plane capable of carrying 30 passengers and equipped with a restaurant. A steward will be in attendance at all times during voyages to serve hot meals to the passengers. Another machine now under construction in London for the Constantinople aerial route will be a winged copy of the modern railway sleeper having berths and dressing rooms.

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous, Sleepless Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Potato Crop Less

The U. S. department of agriculture estimates the combined potato crop of Canada and the United States at 425,000,000 bushels below that of last year. On the other hand potato production in Europe is estimated at 18,000,000 bushels more than that of 1924, and of Tunis at 24,000,000 bushels more than for 1924.

A fountain pen is more apt to leak when it is almost empty because the heat of the hand causes the air inside to expand, tending to force out the ink.

Saves $24 A Year

Cooking experts figure that the SMP Enameled Ware Roaster will save the average Canadian family fully $24.00 a year in meat bills. The secret is, it roasts the meat with very little shrinkage. Also, it makes cheap cuts taste like the best ones.

You place the roast in the roaster, put on the cover; the roaster does the rest. No basting required. Every roast is perfectly cooked.

The cover fits close, so that cooking odors cannot escape. Grease can't spatter out, which means a neat clean oven. Prices range from $3c to $3.50 each, depending on size and finish—and don't forget the saving of $24.00 yearly.

IN MEMORIAM

IN LOVING MEMORY of our dear son, Joshua Jackman (Our Jossie) who died Oct. 26, 1921. Ever remembered by his Father, Mother, Sisters and Brothers, Auntie and Uncle.

In a world of pain and care,
Lord, Thou couldst no longer leave him.
To Thy meadows bright and fair,
Lovingly Thou didst receive him.
Lost awhile our treasured love,
Gained forever, safe above.

NEW RUST RESISTING VARIETY OF WHEAT

A new wheat which gives great promise of being resistant to black stem rust, the result of selecting and hybridizing seven times, has been developed by Samuel Larcombe, internationally famous agriculturist, of Birtle, Man. The new wheat has been named "Aximster" and while not claimed to be an absolute rust resistant, it shows almost perfect resistance.

LIGHTNIN'

Dr. Gershaw addressed a meeting here last Saturday evening. He was accompanied by Hon. W. A. Buchanan. On Tuesday evening of this week a meeting was held in the interests of Mr. Blackstock. This meeting was addressed by Mr. Ellerton and Mr. Blanchard. Both these meetings were well attended but as the election is now over we are not reporting them fully.
